

Best Practices for Businesses

1. Promoting Splitit on your Shopping Path

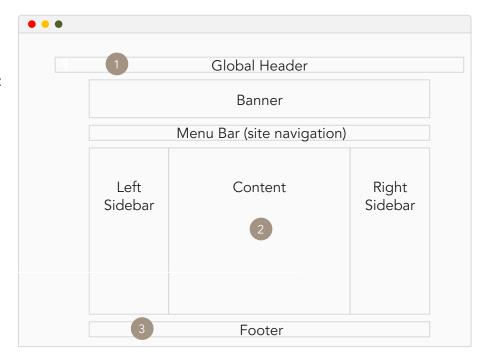

#### Adding Splitit to Your Homepage

We recommend you promote Splitit on your homepage to inform customers that you offer installment payments.

We have created an array of banners so you can choose what best suits your site and shopper demographic.

\*Adding Splitit to the footer also shows that it is a trusted payment option

#### Adding a Pop-Up

Adding a pop-up upon entering your site is the #1 way to showcase the Splitit payment option.

We recommend to add a pop-up at the following times:

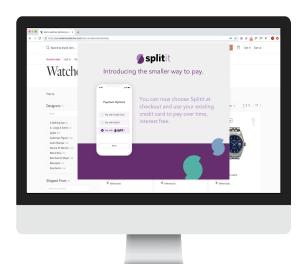

- The first week after implementing Splitit
- Peak shopping times such Black Friday, Christmas etc.
- During sales and promotions

#### Where to link the pop up:

- New product
- New collection section
- Homepage

#### Continuing on to the Product, Cart and Checkout Page

Displaying the estimated Splitit monthly payments is the most effective way to increase your total sales and average order value, while decreasing shopping cart abandonment.

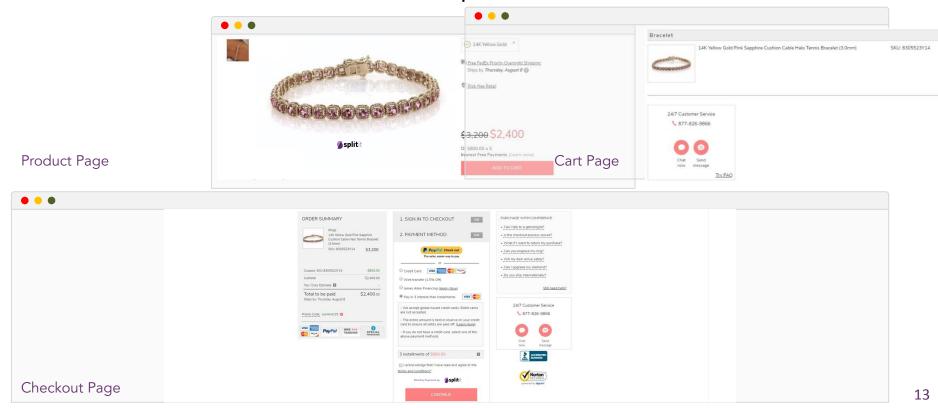

"Since offering Splitit to customers, the average order value has increased by more than 15% for shoppers spending more than \$120 in products. We have also seen more than a 10% decrease in checkout abandonment for high order value baskets."

#### Linking to the "Learn More" Page

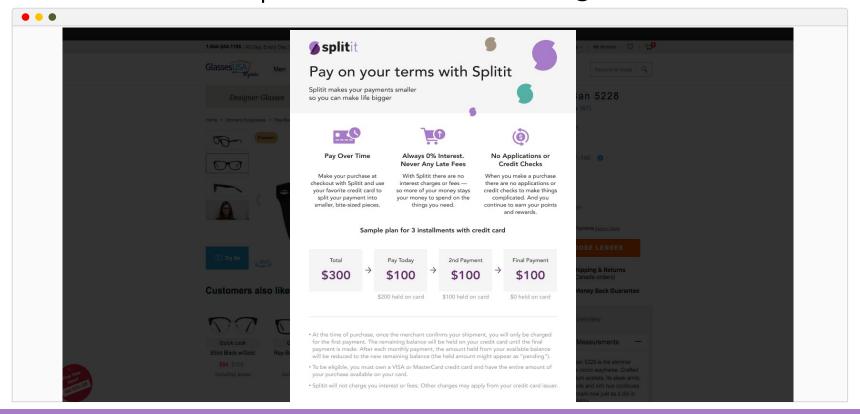

Along your shopping path, we suggest adding a button that pops-up to a "Learn More" page that fully explains how Splitit monthly installments work. The "Learn More" can be used directly on your site, or as a reference for a page that you customize.
