Use this pathway for a resident having oral/dental problems such as broken, carious, or loose teeth; inflamed gums; mouth sores or mouth pain; denture problems; or chewing problems. If mouth or facial pain was identified, the pain care area must be initiated and completed. If oral/dental concerns are determined to be a result of an adverse side effect of a medication, the unnecessary medications care area must be initiated and completed.

Re	eview the Following in Advance to Guide Observations and Interv	iews:							
	Review the most current comprehensive and most recent quarterly (if the comprehensive isn't the most recent) MDS/CAAs for Sections C – Cognitive Patterns, G – Functional Status, J – Prognosis (J1400), K – Swallowing/Nutritional Status, L – Oral/Dental Status, and O - Special Treatment/Proc/Prog – hospice (O0100K).								
	Physician's orders (e.g., mechanically altered diets, assistive oral care devices, medications that have an anticholinergic effect such as antidepressants, antihistamines, and antiarrhythmic agents).								
	Pertinent diagnoses.								
	Care plan (e.g., scheduled/routine dental examinations or referrals, how staff arrange for dental/oral care services, oral/dental/denture care based on the identified problem and relevant conditions [e.g., cancer, end of life], assistive oral care devices, nutritional issues [e.g., mechanically altered diet], efforts to find alternative means to address the needs identified in the assessment process if a resident refuses oral care).								
O b	Observations:								
	What signs of dental and oral health concerns does the resident exhibit:	Are observations of the resident's dental/oral status consistent with the comprehensive assessment? If not, describe.							
	Difficulties with chewing;Partial or full dentures that fit improperly;	☐ What alternative interventions were attempted if a resident resists dental/oral care?							
	 Lack of partial or full dentures if missing natural teeth (partially or totally edentulous); 	Are sufficient staff available to provide assistance with dental/oral health concerns, as needed? If not, describe.							
	 If the resident is not receiving anything by mouth (NPO), lack of special mouth care to maintain the health of oral mucous membranes; Redness, sores, white patches in the mouth, dried cracked lips, dry furrowed tongue, or other manifestations reflecting oral conditions. 	☐ Are standard precautions followed during oral care?							
		Are medications for the oral cavity correctly applied/administered (ensure a qualified surveyor observes)?							
		Are supplies - such as a toothbrush, toothpaste, denture cleaner, denture adhesive - provided to meet the resident's care-planned needs for dental and oral care?							

FORM CMS-20070 (11/2017)

Res	sident, Resident Representative, or Family Interview:		
	Do you have any dental concerns that have not been addressed to your satisfaction? If so, describe.		w did the facility ensure you were able to continue to eat or drink ile waiting for dental services?
	Are you aware of any medications that you are taking that may be contributing to the dental concern, if applicable? If so, describe.		w did the facility assist you in obtaining dental services that were eded or requested?
	Are you experiencing any pain or difficulty eating as a result of the dental/oral concern? What is the facility doing to address it?		you receive Medicare or Medicaid? If so, were you only charged services not covered and were you notified of those charges?
	Did the facility promptly address the dental/oral concern?	How did the facility assist you in arranging transportation to der	w did the facility assist you in arranging transportation to dental
	What alternative options has the facility discussed with you if you have resisted dental/oral care?		pointments? Did a staff person accompany you if needed (due to resident's condition) or requested?
	Have you had missing or damaged partial or full dentures? If so, was a referral made within three business days? If not, was an explanation given to you?		
Sta	ff Interviews (Nursing Aides, Nurse, DON, Social Services):		
	Can you explain how oral/dental services, interventions, or treatments should be carried out? How are follow-up visits or recommendations from a dentist provided to the facility? How is this information communicated to direct-care staff including staff from different shifts?	mag Ho rev	nat potential adverse side effects of the resident's medications y be contributing to the dental/oral concern? w did you involve the resident or resident representative in the riew and revision of the care plan?
	What, when, and to whom do you report indications of oral/dental changes, including oral/dental pain or lost or damaged partial or full dentures?	 Nursing Aide: What training have you received related to the car of a resident with dental/oral concerns and the resident's routine preventive dental care? Nurse: What training have you received related to the assessmen and care of dental/oral concerns? 	
	How do you monitor for the implementation of the care plan,		
	effectiveness of interventions, and any changes in symptoms that have occurred over time?	☐ If c	care plan concerns are noted, interview staff responsible for care nning as to the rationale for the current plan of care.
	How does the facility ensure that a dentist is available for residents in accordance with professional standards of quality and timeliness?	1

Critical Element Decisions:

1) For private-pay or Medicare-funded residents, did the facility promptly provide, or obtain from an outside resource, routine and emergency dental services to meet the resident's needs, including assisting with appointments and transportation arrangements?

If No, cite F790

NA, the resident is not private-pay and is not Medicare-funded.

2) For Medicaid-funded residents, did the facility promptly provide, or obtain from an outside resource, routine and emergency dental services to meet the resident's needs, including assisting with appointments and transportation arrangements?

If No, cite F791

NA, the resident is not funded by Medicaid.

3) For newly admitted residents and if applicable based on the concern under investigation, did the facility develop and implement a baseline care plan within 48 hours of admission that included the minimum healthcare information necessary to properly care for the immediate needs of the resident? Did the resident and resident representative receive a written summary of the baseline care plan that he/she was able to understand? If No, cite F655

NA, the resident did not have an admission since the previous survey OR the care or service was not necessary to be included in a baseline care plan.

4) If the condition or risks were present at the time of the required comprehensive assessment, did the facility comprehensively assess the resident's physical, mental and psychosocial needs to identify the risks and/or to determine underlying causes, to the extent possible, and the impact upon the resident's function, mood, and cognition?

If No, cite F636

NA, condition/risks were identified after completion of the required comprehensive assessment and did not meet the criteria for a significant change MDS OR the resident was recently admitted and the comprehensive assessment was not yet required.

5) If there was a significant change in the resident's status, did the facility complete a significant change assessment within 14 days of determining the status change was significant?

If No, cite F637

NA, the initial comprehensive assessment had not yet been completed; therefore, a significant change in status assessment is not required OR the resident did not have a significant change in status.

- 6) Did staff who have the skills and qualifications to assess relevant care areas and who are knowledgeable about the resident's status, needs, strengths and areas of decline, accurately complete the resident assessment (i.e., comprehensive, quarterly, significant change in status)? If No, cite F641
- 7) Did the facility develop and implement a comprehensive person-centered care plan that includes measureable objectives and timeframes to meet a resident's medical, nursing, mental, and psychosocial needs and includes the resident's goals, desired outcomes, and preferences?

FORM CMS-20070 (11/2017)

If No, cite F656

NA, the comprehensive assessment was not completed.

8) Did the facility reassess the effectiveness of the interventions and review and revise the resident's care plan (with input from the resident or resident representative, to the extent possible), if necessary to meet the resident's needs?

If No. cite F657

NA, the comprehensive assessment was not completed OR the care plan was not developed OR the care plan did not have to be revised.
