

Care Plan Audit

MDS Staff will review and revise at least 6 resident care plans per week until 100% of residents care plans have been reviewed and revised.

- All triggered areas from the most recent CAAs are addressed in the person-centered plan of care.
- The **focus statement** identifies a condition, risk, or need specific to the resident.
- **Goals** are measurable, attainable, and relate to how the **focus statement** affects the resident’s day to day needs and quality of life.
- **Goals** are given an appropriate time frame.
- **Interventions** are person-centered and customized to reflect the care that is needed or desired by the resident.
- **Kardex** is free from unnecessary information for direct care. Interventions are brief, concise, and easy to find and read by direct care staff.
- An interdisciplinary review of the plan of care has been scheduled with the next OBRA MDS Assessment.

Resident	Date of Review	CAA Triggers addressed (yes or no)	FOCUS statement person-centered (yes or no)	FOCUS statement identifies need, risk, or condition (yes or no)	GOALS are measurable, attainable, and have appropriate timeframe (yes or no)	GOALS relate to FOCUS and resident’s care, needs, quality of life (yes or no)	INTERVENTIONS personalized to reflect resident needs/wants (yes or no)	KARDEX is brief, concise, easy to find/read (yes or no)	Date of IDT Review with next OBRA	Review Completed By:
