

KAI Investment Management

Driving Investment Relationships Through Digital Experiences

“66% of children fire their parents' financial adviser after they inherit their parents' wealth.

— Boston Consulting Group

Meet KIM

Built with the most advanced Conversational AI technology in the financial services industry, KIM provides the next level of digitally-engaging experiences that resonate & excite tech-savvy banking customers.

KIM's digital assistant gets to know your customers, learns their goals, life plans, & what's really important to them financially - and intelligently assists the investment professional throughout their financial journey, anytime, anywhere.

KIM also assists the financial advisor, by providing answers & insights, quickly responding to portfolio and investment questions & helping them to service their customers, cost effectively, intuitively and insightfully.

The investment management industry is preparing for the greatest transfer of wealth in modern history.

\$50+ trillion of investable assets over the next decade will be transferred from one generation to another. This shift in generational wealth will bring big changes in how financial advisors and wealth managers will engage with their clients. And a new investor demographic will demand digital capabilities that deliver an intelligent and friction free investment experience. Conversational AI, and the Intelligent Digital Assistant will be the centerpiece of many of these digital investment experiences.

KIM cares about your customers, continually thinking about their financial journey.
