

A UNISON RISK ADVISORS Company

Vaccine Tracking Solution

Now, more than ever, having a comprehensive system for tracking your organization's vaccination/testing efforts is critical to your business' risk management process. The SISCO Vaccine Tracking Solution is available to seamlessly track initial COVID-19 vaccinations, booster shots, weekly testing requirements, as well as other vaccination efforts – including annual flu shots.

Our Vaccine Tracking Solution combines the unparalleled analytics expertise and service approach of the SISCO team with top-of-the-line technology. This solution helps to protect your organization's population and keep accurate vaccination records, including, vaccine manufacturer, vaccination dates, administrator, proof of vaccination documentation, and all necessary waiver and testing information.

Service to Help You Move Forward

Tracking your entire population's vaccination status can be a daunting task. SISCO's team will work with you directly to help guide your vaccination tracking and analytics to ensure a smooth user experience. In addition, the SISCO team will provide several key services to help make your program a success:

Data Right at your Fingertips

All of your data is in a useable format from day one. Using your organizational structure, we provide easy to read vaccination dashboards and reports by division, facility or location, as well as overall for your organization.

Custom Reporting Built for Your Population

We work with you directly to ensure your team stays in the know. You will gain access to run reports from SISCO's Vaccination Library, create custom reports and easily pull lists of stakeholder populations by vaccine status at the click of a button.

Deliver Results to Key Stakeholders

We will work with you to schedule reports and dashboards to be automatically delivered to key vaccination stakeholders within your organization.

Our Vaccination Tracking Solution is designed for optimal vaccine tracking and can be customized when needed to meet your organization's specific needs. Your SISCO representative can help tailor your dashboards and reports to create a tracking program custom fit for your organization and its key populations.

Customizable Dashboards & Reports

SISCO's Vaccination Tracking Solution allows you to track a multitude of vaccination statistics all through the award-winning Origami Risk program. You will have access to an intuitive dashboard as well as informative vaccination reports to track your progress.

The SISCO Vaccination Tracking Solution allows you to track:

- ✓ Number and list of population vaccinated.
- ✓ Number of population opting out of vaccination.
- ✓ Required weekly testing dates and results.
- ✓ Percentage of population vaccinated by state, location, and department.
- ✓ Percentage of population missing dosage/booster.
- ✓ Upcoming booster shots due.
- ✓ Vaccinations by manufacturer.
- ✓ Adverse reactions and related workers' compensation claim number (for employee vaccinations).

With the new vaccination and testing mandate, vaccine tracking solutions are even more important. Our vaccination tracking module is a great fit for any organization just starting their COVID-19 vaccination tracking efforts or those with complex programs already underway. Our SISCO team can work with you to transfer manual data and get you up and running in no time. Additionally, the program is built to be used for any vaccination tracking effort, including for booster shots that may become necessary or even traditional vaccinations such as the annual flu shot.

Why a Spreadsheet Simply Won't Cut It...

With the complex, and constantly evolving requirements for COVID vaccinations and/or weekly testing, keeping track of your efforts in a spreadsheet may create even more headaches for your team.

Here's why a comprehensive tech platform combined with service from a knowledgeable risk consultant team is critical to the success of your vaccination/testing efforts:

- ✔ Your HR and Risk Management team should be focused on helping your employees through these requirements, not be overwhelmed with the burden of significant and complex data entry efforts.
- ✔ Providing a centralized data location ensures that all efforts are administered equally across your organization.
- ✔ Never run into issues with having those responsible for data entry being locked out of a shared spreadsheet.
- ✔ Easily add fields and data points as requirements evolve or boosters become available.
- ✔ Easily pull reports based on vaccination manufacturer and dates to ensure boosters and follow ups are received at the appropriate times.
- ✔ Track not only vaccinations, but also waivers, weekly testing requirement dates and results per employee.
- ✔ Continuously update employee census file to ensure that new hires and terminations are added/removed and are not skewing the overall vaccination reports.
- ✔ Ability to pull and visualize data easily by department, office, division, employee type and more.

Our vaccination tracking module is a great fit for any organization just starting their COVID-19 vaccination tracking efforts or those with complex programs already underway. Our SISCO team can work with you to transfer manual data and get you up and running in no time.
