

Omnijet Valve Body Alignment Upgrade

<p>Purpose:</p>	<p>When the Valve Body is installed into the collar, proper alignment is required with the High Pressure inlet to ensure a good seal is made with the High Pressure fitting. Jet Edge has released a self-aligning Valve Body and collar set that ensures alignment and sealing on the first attempt.</p>
<p>Systems:</p>	<p>Omnijet Cutting Heads</p>
<p>Details:</p>  <p>Alignment Flats</p> <p>Alignment Channel</p>	<p>The Valve Body P/N 46627 has been replaced with the redesigned Valve Body 110607. The new Valve Body has a shoulder with flats that align the Valve Body into the redesigned collars via an alignment channel. The redesigned Valve Body is compatible with all prior collars, however, to take advantage of the alignment feature, a new collar is required.</p> <p>You will find your collar P/N in the manuals that came with your equipment. The most common collars are shown in the diagram below.</p> <p>To learn more about Omnijet Cutting Heads and Valve Bodies, visit our Resource Center at https://jetedgewaterjets.com/resources/ and watch our Maintenance Training Video: Omnijet III Cutting Head Rebuild.</p>
<p>Benefit:</p>	<p>The self-alignment features are now built into the Valve Body and Collar to ensure proper alignment with the mating High Pressure fitting on the first try.</p>
<p>Order Now:</p>	<p>Call 1-800-JET-EDGE and ask for Parts Sales to learn more about this Technical Bulletin or visit our e-Commerce store at https://jetedgewaterjets.com/jet-edge-e-commerce-store/ to order your new Valve Body and upgraded collar.</p>
