

## Windows 10 Software Upgrade

|                   |   |
|-------------------|---|
| <b>Purpose:</b>   | The end of life for the Windows 7 Operating System was January 14th, 2020 and the end of life for the Windows XP Operating System was April 8th, 2014. Microsoft will no longer provide security updates and technical support for these operating systems.   |
| <b>Systems:</b>   | All Aquavision DI Controls with Windows 7 and Windows XP Operating Systems. To determine which operating system you are currently operating: <ol style="list-style-type: none"> <li>1. Click the Start Button</li> <li>2. Type “winver” in the search box and press Enter</li> <li>3. You should see the About Windows box with your Windows version information</li> <li>4. Make note of the windows version when contacting Jet Edge</li> </ol>   |
| <b>Details:</b>   | The full Windows 10 upgrade includes the replacement of your current system PC with a new solid state drive PC, preloaded with Windows 10 software. Depending upon the PC installed in your current controller, other options to upgrade may be available. The upgrade can be performed by a qualified maintenance technician or a Jet Edge service Technician will arrange to do the install at your site.   |
| <b>Benefit:</b>   | Windows 10 Software updates are required to ensure your operating system is supported and that the most recent security patches are installed. Additional benefits include: <ul style="list-style-type: none"> <li>• Improved Security: Keep your network secure and protected with Windows 10 security features, manufacturer support, and patches.</li> <li>• Faster Speed: The addition of a solid state drive is included with a full Windows 10 Software Upgrade. Solid state drives offer better performance and demands less power.</li> <li>• Durability: Solid state drives contain no moving parts and are better suited for rugged environmental conditions. Jet Edge PC’s are designed for industrial applications and harsh environments.</li> </ul> |
