Brainspace

Make Smarter, Faster & More Informed Decisions

Data is always growing in size and complexity. Do you have the tools to handle It?.

BENEFITS

- Increase productivity by up to 90%
- Find the right answers faster
- Learn how data is developed & shared
- Incorporate & improve human insight
- Visualize how topics related to each other
- Empower deicions making throughout

Data is one of your organizations most precious assets. But with its continued exponential growth and the constantly evolving landscape of new content sharing applications, how can you effectively mine your data to reduce your firm's legal risk or analyze it for actionable intelligence?

Experts estimate that by 2025, governments, corporations and individuals will have accumulated 175 zettabytes of data. That means your organization's data is growing at an annual compound rate of approximately 60%. You need to cut through this data overload with an intuitive artificial intelligence solution that easily combines human expertise with interactive data visualizations and machine learning to accelerate the identification of what matters.

Brainspace is a powerful yet practical artificial intelligence solution that enables you to make smarter, faster and more informed data decisions. Our software provides a unique and patented approach to data analysis. Brainspace dramatically increases the speed and efficiency by which you analyze data across a number of different use cases. Whether you're responding to a legal matter, analyzing data for compliance or simply mining your organization's data for actionable intelligence, Brainspace can improve your team's efficiency by as much as 90%. The intuitive user interface can easily guide you down a path of uninterrupted data discovery and enlightenment.

INVESTIGATIONS

Find out who knew what and when quickly with tools like interactive visualizations, concept search and Continuous Multimodal Learning. For organizations that do lots of the same kind of investigations – like identifying sexual harassment or tracking negative social media sentiment – portable models can accelerate the process of finding the answers you need.

EDISCOVERY

Don't burn out your team wading through irrelevant data. Visualization technologies like our Cluster Wheel allow you to focus in on the most relevant information rapidly, while the Metadata Dashboard makes it easy to remove non-relevant clusters and concentrate on relevant Entities and timeframes.

INTELLIGENCE MINING

Analyze your organization's data lakes for actionable intelligence and valuable insights, Brainspace finds things that would rather stay hidden, seeing through code names and other obfuscations to get right to the high value data faster than any other data analytics platform on the planet.

COMPLIANCE

Brainspace can empower your compliance team to quickly and efficiently analyze communication content for potential policy violations and legal risk. Our data visualizations, transparent concept search and machine learning technology can expedite the identification of compliance issues while suppressing the communication noise.

Brainspace has all the tools you need to get the answer you want, no matter what you are looking for

FIND THE RIGHT ANSWERS FASTER

Advanced machine learning that analyzes unstructured & structured data at lightening speed saving you valuable time and money

LEARN HOW DATA IS DEVELOPED & SHARED

Interactive visualizations connect people, time and concepts with a point & click modern intuitive interface

INCORPORATE AND IMPROVE HUMAN INSIGHT

Our software captures the way your team makes decisions about data using a range of text analytics tools, then applies next generation supervised learning to continually refine and improve results.

VISUALIZE THE WAY TOPICS RELATE TO EACH OTHER

Cluster Wheel visual shows you at a glance how key topics are linked. Similar issues are grouped with colored coding.

REFINE SEARCHES FOR MORE ACCURATE RESULTS

Too many results? Too few? Transparent Concept Search significantly reduces the time and expense resulting from over-inclusive keyword searches. It allows you easily see how amplifying or eliminating search concepts effects results, while removing low value data with metadata filters.

FIND THE DATA YOU DON'T KNOW YOU NEED

Our technology helps you uncover ideas, concepts and issues that you may not realize are embedded in your data, giving analysts and end users the ability to make better decisions

EMPOWER DATA DECISION-MAKING

You don't have to be a data scientist to use Brainspace's intuitive platform. We enable employees at all levels of your organization to harness the power of your data, through easy-to-understand data visualizations and machine learning.

A leader in advanced data analytics and machine learning

Brainspace is an artificial intelligence platform that seamlessly combines industry leading machine learning technology with interactive data visualizations. Our patented solution enables users to expedite insights for investigations, eDiscovery, Intelligence Mining, and Compliance. Our customers include the Fortune 500, leading consulting firms, legal service providers and government agencies.
