Self-service with low maintenance

Built for both IT and end-users, take control of your integrations with the Celigo standalone application

Customizable and expandable

Data integration flows can be customized and expanded with Celigo's iPaaS, without requiring technical resources

What is an Integration App?

Many other vendors offer recipes and accelerators that help connect different applications. However, **only Celigo offers Integration Apps.**

Integration Apps are fully managed, standalone SaaS applications that connect two applications. They are built on an iPaaS, which allows for a level of robustness and customization not possible with direct connections.
