

# Manage and Analyze NetSuite Data, in Real-time from Excel

Whether you need to upload small or large amounts of data, analyze multiple saved searches simultaneously in Excel, join Excel and Power BI, or generate reports faster, CloudExtend Excel for NetSuite provides business users with a comprehensive solution to accomplish these goals.

## Leverage one solution for updates and analysis

CloudExtend provides your organization with a solution for both NetSuite data updates and reporting tasks, all from one Excel-based app. Empower your teams to save time and work where they are most comfortable to produce better insights.

## Reduce time spent in meetings and make better business decisions

Share metrics and dashboards or embed them directly into NetSuite and eliminate the need for recurring meeting updates. By combining CloudExtend, Excel, and Power BI, your NetSuite data can drive important business decisions faster.

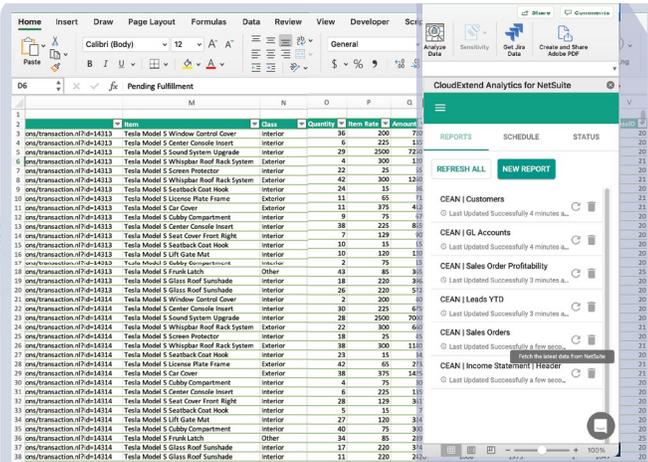

## Gain the flexibility to define, edit and customize NetSuite reporting

Combine one or more saved searches and create multiple joins to visualize your NetSuite data in new ways. Run your searches on schedules or refresh them on-demand with a single click.

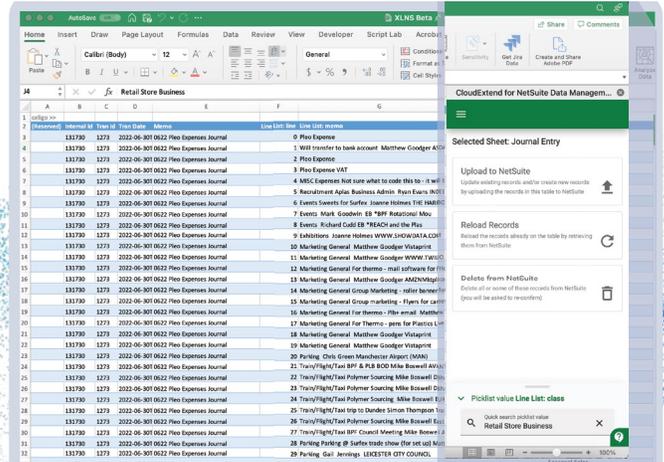

## Build professional dashboards and visualizations

Build executive dashboards in Excel or link to powerful BI tools. Leverage familiar Excel formulas, Excel Power Query, DAX, and Power BI visualizations to learn more from your NetSuite data.

Run your NetSuite saved searches without leaving Excel

Upload NetSuite transactions with up to 10,000 lines in seconds

# What CloudExtend Excel for NetSuite Does for You

## Reduce Manual Effort

Eliminate CSV exports by running your NetSuite saved searches directly from Excel, on-demand, or on a schedule. Eliminate CSV imports by importing directly from Excel.

## Eliminate Errors

Gain confidence that your data is valid in advance with real-time in-cell data validation and support for dependent picklist fields. End the cycle of waiting for CSV uploads to run, hoping for the best.

## Gain New Insights, Faster

Bypass the NetSuite UI and work faster in Excel with support for upserts of up to 10K lines per transaction. Report on disparate data sets by combining multiple NetSuite saved searches using Excel or Power BI.

## Stay Secure

CloudExtend is part of NetSuite's Built for NetSuite (BFN) program. Users log in using native 3-step authorization with full support for two-factor authentication and Single Sign On and all NetSuite roles and permissions are respected.
