

Secure, Excel-based Management of NetSuite Data

CloudExtend allows users to access and edit NetSuite data directly in Excel with a single click. Take full advantage of Excel's data manipulation functions to retrieve, update, add, and delete NetSuite data from multiple record types. Need more from the traditional CSV import/export tool for NetSuite? Try CloudExtend today.

What CloudExtend Excel for NetSuite Does for You

Faster Updates

CloudExtend allows you to update multiple NetSuite records in seconds.

Greater Flexibility

CloudExtend allows you to work anywhere. Sign in and all of your customizations and templates are immediately available.

Security Integration

NetSuite admins can rest easy knowing that existing roles and permissions are enforced by CloudExtend.

Eliminate Errors

Gain confidence that your data is valid in advance. End the vicious cycle of waiting for CSV uploads to run, hoping for the best.

No Back & Forth

The auto-resolving picklist feature puts an end to having to navigate between Excel and NetSuite to see a list of valid values.

Reduce Manual Effort

No more exporting results to CSV files. Do it all in Excel with the CloudExtend data filters or leverage NetSuite saved searches.

Platform Agnostic

CloudExtend Excel works on Mac & PC, so users can choose the computer and OS they prefer to work in.

Leverage the Power of Excel

Use your existing spreadsheets with complex models and formulas to update data into NetSuite.
