

The Most Complete Sync Solution for Google Workspace and NetSuite

Celigo CloudExtend Google Workspace for NetSuite enables true cloud-to-cloud synchronization of your Gmail, Calendar, and Google Drive files with NetSuite records. CloudExtend for Google Workspace increases your efficiency by significantly reducing manual effort required to keep both systems in sync. Built using NetSuite SuiteCloud technology, CloudExtend can be configured and working in as little as 30 minutes.

What CloudExtend Google Workspace Does for You

Organizational Transparency

Important emails, calendar events, and files can be shared outside of your mailbox for a 360 degree view of activity in NetSuite.

Email Autopilot

Save time by moving entire email threads into NetSuite automatically with Autopilot even while you're sleeping.

Easy Email and File Attachment

With a single click, you can attach your email and selected file attachments to NetSuite records.

Storage Savings

Leverage Google Drive benefits directly in NetSuite by associating files and folders with NetSuite records, minimizing storage space.

Faster Updating

View or edit your NetSuite records directly from Gmail with one click.

Security Integration

IT Admins can rest easy knowing CloudExtend is tested for every NetSuite major release.
