

The Ultimate NetSuite Integration Suite for Microsoft 365

CloudExtend is a suite of apps that seamlessly integrates NetSuite with Microsoft 365 and lets your users work securely in NetSuite from their favorite productivity tools: Excel, Outlook Mail & Calendar, SharePoint and OneDrive.

**ORACLE
NETSUITE**

Everything You Need from NetSuite, In your Inbox

Organizational Transparency

Important emails, calendar events, and files can be shared outside of your mailbox for a 360 degree view of activity in NetSuite.

Email Autopilot

Save time by copying entire email threads into NetSuite automatically with Autopilot even while you're sleeping.

Easy Updates, Email and File Attachment

With a single click, you can update NetSuite records, as well as attach emails and files to those records.

Storage Settings

Leverage OneDrive/SharePoint benefits in NetSuite by associating files and folders with NetSuite records, minimizing storage space.

Manage and Analyze NetSuite Data, in Real-time from Excel

Leverage one solution for updates and analysis

CloudExtend provides your organization with a solution for both NetSuite data updates and reporting tasks, all from one Excel-based app. Empower your teams to save time and work where they are most comfortable to produce better insights.

Reduce time spent in meetings and make better business decisions

Share metrics and dashboards or embed them directly into NetSuite and eliminate the need for recurring meeting updates. By combining CloudExtend, Excel, and Power BI, your NetSuite data can drive important business decisions faster.

Gain the flexibility to define, edit and customize NetSuite reporting

Combine one or more saved searches and create multiple joins to visualize your NetSuite data in new ways. Run your searches on schedules or refresh them on-demand with a single click.

Build professional dashboards and visualizations

Build executive dashboards in Excel or link to powerful BI tools. Leverage familiar Excel formulas, Excel Power Query, DAX, and Power BI visualizations to learn more from your NetSuite data.
