

The Ultimate NetSuite Integration Suite for Microsoft 365

CloudExtend is a suite of apps that seamlessly integrates NetSuite with Microsoft 365 and lets your users work securely in NetSuite from their favorite productivity tools: Excel, Outlook Mail & Calendar, SharePoint and OneDrive

CloudExtend Outlook provides a 360° view of important information for your teams working in NetSuite

Organizational Transparency

Important emails, calendar events, and files can be shared outside of your mailbox for a 360 degree view of activity in NetSuite.

Easy Updates, Email and File Attachment

With a single click, you can update NetSuite records, as well as attach emails and files to those records.

Email Autopilot

Save time by copying entire email threads into NetSuite automatically with Autopilot even while you're sleeping.

Storage Savings

Leverage OneDrive/SharePoint benefits in NetSuite by associating files and folders with NetSuite records, minimizing storage space.

CloudExtend Excel Data Management is a Swiss Army Knife for your organization

Reduce Manual Effort

No more exporting results to CSV files. Do it all in Excel with the CloudExtend data filters or leverage NetSuite saved searches.

Eliminate Errors

Gain confidence that your data is valid in advance. End the vicious cycle of waiting for CSV uploads to run and hoping for the best.

Faster Updates

Upload multiple records to NetSuite directly from an Excel sheet. Bypass the NetSuite UI for faster data entry and updates.

Security Integration

NetSuite admins can rest easy knowing that NetSuite permissions are enforced.

CloudExtend Excel Analytics helps you visualize and report on NetSuite Data in Excel

Faster Insight

Run one or more saved searches with a single click and obtain near real-time data.

Flexible Schedules

Put reports on a schedule with ease from Excel.

Create Multiple Joins

Combine unlimited joins across one or more saved searches to analyze NetSuite data like never before.

Get the Right Data

Share and distribute easy-to-consume reports to the right non-NetSuite users at the right time.
