

## Everything You Need From NetSuite, In Your Inbox

CloudExtend offers you an intuitive platform for creating, editing, and viewing NetSuite records directly in Outlook. Gain instant organizational visibility into your important communications by attaching emails to NetSuite records from Outlook with one click. Eliminate the need to copy and paste emails today!

# Reduce Time and Effort Spent Keeping Both Systems in Sync

## Organizational Transparency

Important emails, calendar events, and files can be shared outside of your mailbox for a 360 degree view of activity in NetSuite.

## Easy Email and File Attachment

With a single click, you can attach your email and selected file attachments to NetSuite records.

## Faster Updating

View or edit your NetSuite records directly from Outlook with one click.

## Email Autopilot

Save time by moving entire email threads into NetSuite automatically with Autopilot even while you're sleeping.

## Storage Savings

Leverage OneDrive/SharePoint benefits in NetSuite by associating files and folders with NetSuite records, minimizing storage space.

## Security Integration

IT Admins can rest easy knowing CloudExtend is tested for every NetSuite major release.
