

FURUNO ECDIS TRAINING COURSES (CLASSROOM)

For professional seafarers, who want type-specific training courses in the functionality and effective use of the FURUNO ECDIS. Upon successful completion of a course, you will receive a certificate from FURUNO Maritime Training.

FURUNO ECDIS training

This training course will provide you with knowledge of the functionality and effective use of the FURUNO ECDIS. Compliant with regulatory demands for maker-approved type-specific certification.

Relevant for: Navigators operating FURUNO ECDIS today or are planning to do so in the future.

Level: Basic or advanced.

Equipment used: FURUNO FEA or FMD ECDIS.

Duration: Basic 2 days. Advanced 3 days.

Admission recommendation: IMO Model Course 1.27 or similar generic ECDIS training.

Course content: Theoretical lectures, discussions, and series of demonstrations. Topics are:

- Basic: Familiarization with available functions and the menu structure. Display setup and setting of safety values. Recognition of alarms and malfunction indicators and the appropriate actions to be taken. Route planning and monitoring. Changing to back-up systems. Loading and updating of charts and licenses. Software updating.
- Advanced: Includes basic training added with extended route planning, exercise training in a full mission simulator, and training in the elements from the FURUNO Integrated Navigation System.
