

# Covid-19 Disinfection

## Creating Safer Workspaces

*Summit Building Services is committed to helping our clients work through the pandemic in a safer fashion. Our standards have now moved past "looking clean" to "being safe."*

### TRUSTED PARTNER

SBS is your trusted local partner for Covid-19 disinfection.

### ADAPTATION

We're constantly adapting to a fluid situation. As your needs change, so do our services.

### LAYERED CLEANING

A tiered cleaning approach that removes dirt while also disinfecting throughout your space

## WHY IT'S IMPORTANT TO COMBINE CLEANING ALONG WITH A DISINFECTION PROGRAM

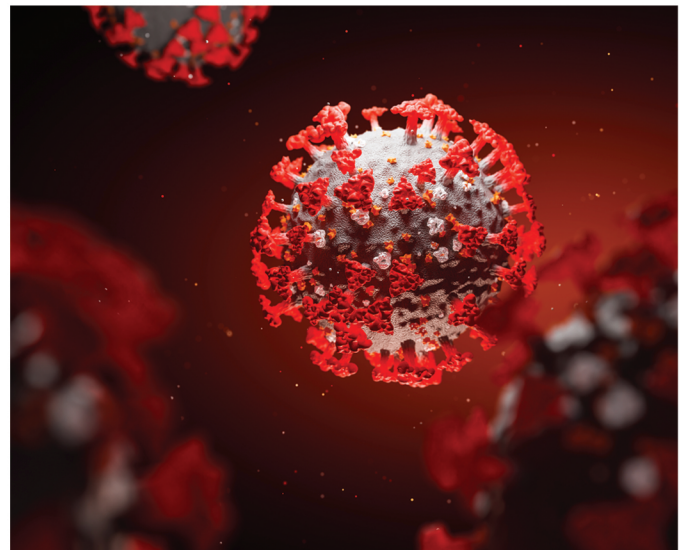

Before starting a disinfection program at your facility, it's important to make sure all surfaces are cleaned beforehand. According to the EPA, the surface removal of dirt removes any opportunity for pathogens to hide. Dirt can also inhibit the germ-killing ability of the disinfectant.

A deep clean removes most of the harmful germs and pathogens, which can then be followed up with a misting of disinfectant spray to eradicate any remaining pathogens.

Call Summit Building Services today to learn about our comprehensive cleaning programs!

*"We understand we're working through unprecedented times. As a small, local business, we're committed to helping our clients weather this storm. We're here to build stronger relationships for the sunnier days ahead."*
