

# Tackle germ hot spots in the workplace with the right wipers

When "clean enough" won't cut it, arm your cleaning staff with single-use disposable wipers.

## How **dirty** is the average working environment?

Dirtier to the touch

**We touch 7,200 surfaces every 24 hours<sup>1</sup>**

You also touch your face 522 times a day.<sup>2</sup>

Dirtier surfaces

**The average desk has 400x more bacteria than a toilet seat<sup>3</sup>**

Think twice before you eat lunch at your desk.

Dirtier devices

**The average mobile phone harbors over 6,300 bacteria<sup>4</sup>**

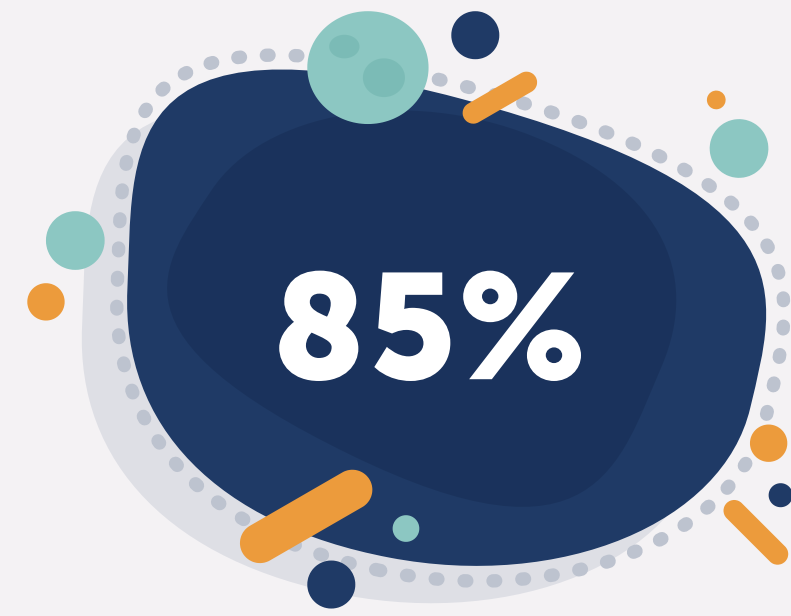

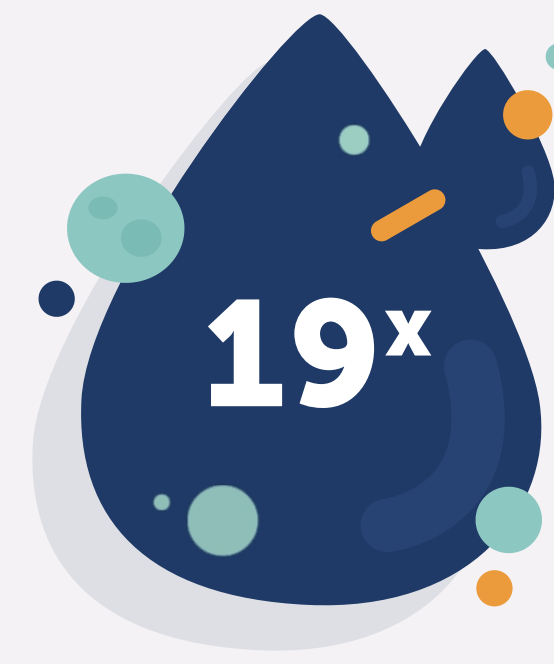

Public transportation, the bathroom, your desk  
—you're using your phone where germs live.

Dirtier environments

**Water fountain spigots have 19x as much bacteria as a toilet seat<sup>5</sup>**

Are you still feeling thirsty?

Dirtier cleaning tools

**Cotton cloths can reduce the efficacy of disinfectant chemicals by up to 85%<sup>6</sup>**

Reusable wiping cloths can contain live germs even after being laundered.

Now ask yourself,

**You've got the *dirt* on workplace germs, are you ready to tackle them?**

**For good workplace hygiene, it takes two**

The Centers for Disease Control and Prevention (CDC) recommend a daily, two-pronged approach to dealing with germs on frequently touched surfaces<sup>7</sup>.

**Step 1**

**Clean with soap or detergent and water**

While cleaning doesn't necessarily kill germs, it lowers their numbers, and the risk of spreading them.

**Step 2**

**Disinfect the surface**

Use EPA-registered household disinfectants to kill germs after cleaning.

# The right tools are as important as the right protocols

Not all wipers are the same. Choose the right wiper for the task to clean with confidence. Consider these hygienic wiping systems:

## Closed bucket wiping system

Unlike cotton rags, the KIMTECH PREP\* Wipers used with the WetTask System are specifically designed to be compatible with commonly used disinfectants.

## Disposable Cleaning Cloths

WypAll® brings the absorbing power of our HydroKnit® technology, designed to out-perform rags.

No adhesives or binders; leaves no residue, WypAll® cleaning cloths offer a safe and clean alternative to rental shop towels.

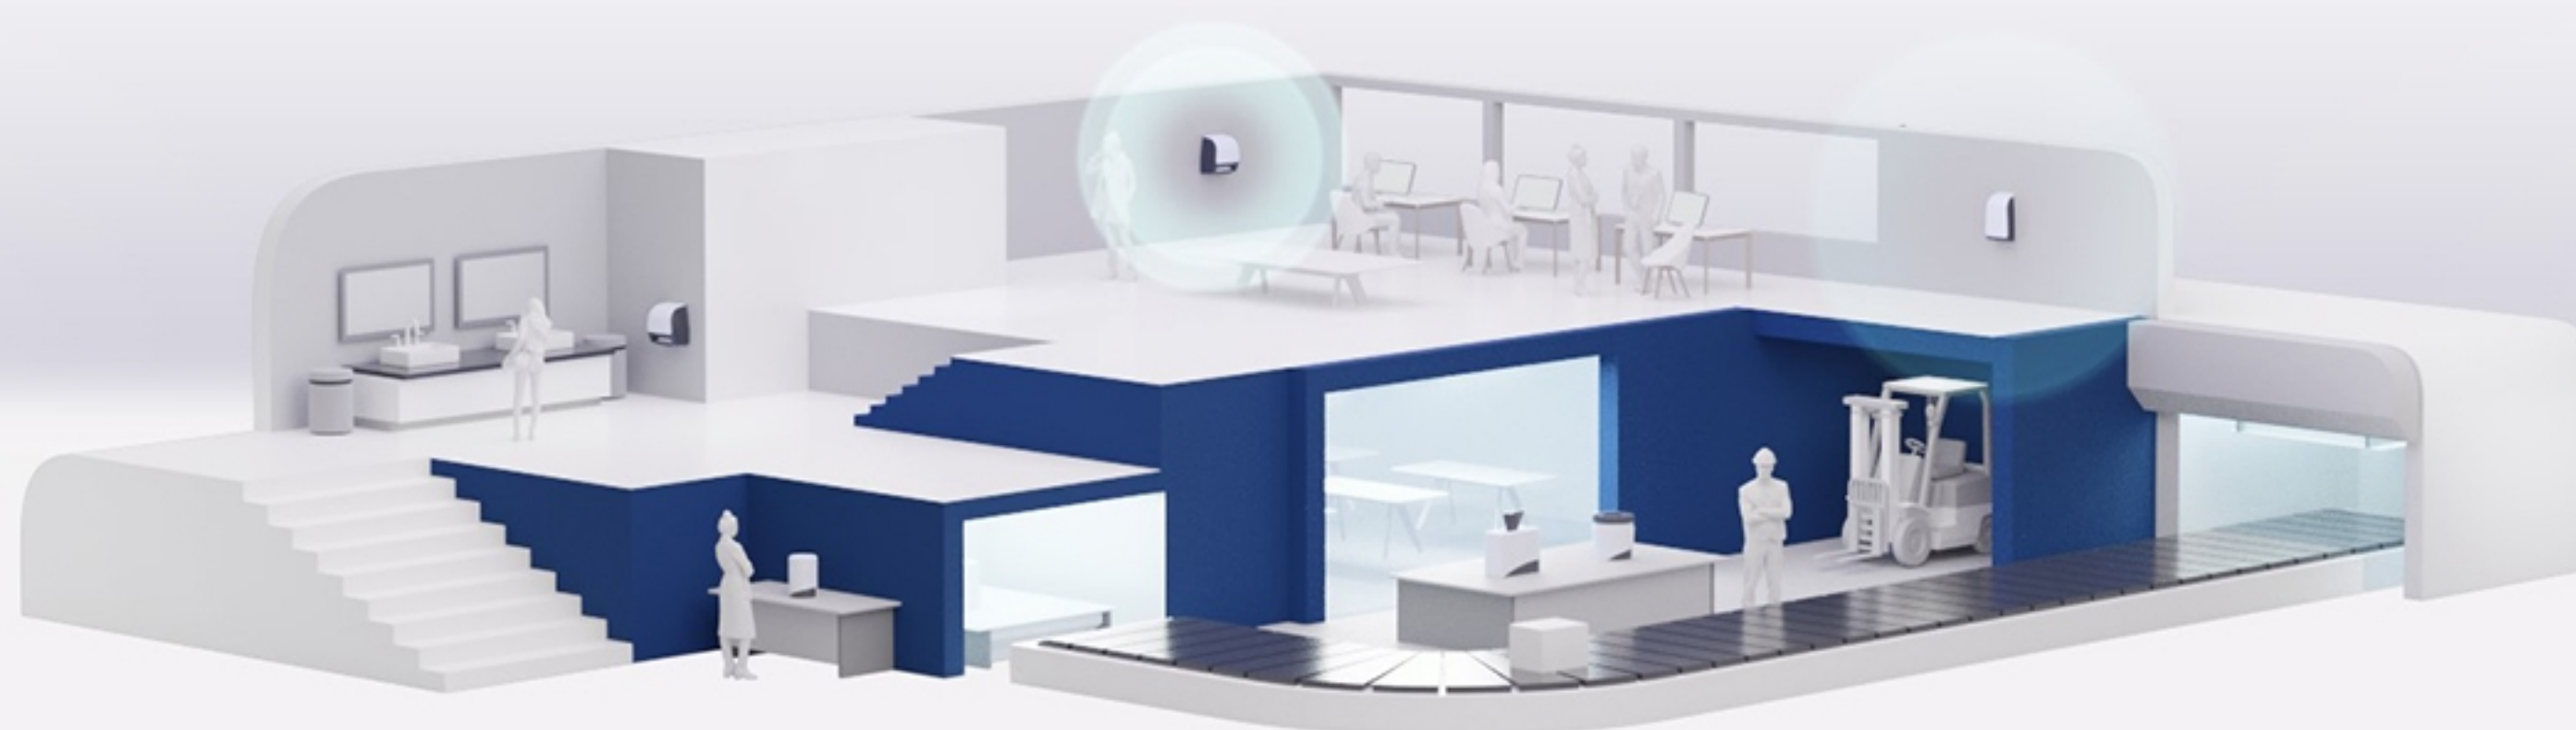

## Pre-Saturated Sanitizing Wipes

Kills bacteria on hard, non-porous, non-food contact surfaces such as bathroom sinks, faucets and other areas.

## Take the next step

Get more tools and resources to create your workplace hygiene improvement plan.
