

EXECUTE AND MANAGE DATA SUBJECT ACCESS REQUESTS

Regulatory authorities have come down hard on organizations that fail to fulfil data subjects' rights, imposing nearly €16 million in related fines. Do not get caught out, PrivacyEngine includes full Data Subject Access Request (DSAR) functionality that is recognized as the best on the market. It is intuitive, collaborative, complete and complaint.

Features:

- Use the Data Subject Log to manage the complete lifecycle of each DSAR you receive and ensure it is responded to within the required time frame.
- Delegate tasks to the appropriate team members.
- Automate the fulfilment of privacy rights (DSAR) requests with our Data Discovery module.
- Correlate data to identities to understand personal data across your business.

Benefits:

- Respond to all the DSAR's that your organisation receives in an efficient and speedy manner.
- Save time –use the platform's data discovery tools to instantly identify and locate all the data needed for each request.
- Save money – avoid fines and legal costs by responding to every DSAR your organisation receives within the legal requirements.
- Fulfil privacy requests within the required time limit– reducing risk associated with handling the requests.

Under the General Data Protection Regulation (GDPR), data subjects have a right to access their personal data, including receiving a copy and to obtain certain information about the data controller's processing. Similar rights of disclosure apply to California Consumer Protection Act (CCPA) under which data subjects have the right to obtain a written disclosure of information processed. DSARs can be time consuming and costly. PrivacyEngine's subject rights log guides organisations through the process of data discovery and responding in a timely and efficient manner.
