

PREPARE AND DOCUMENT ALL OF YOUR IMPORTANT DATA PRIVACY POLICIES

Significantly reduce the time and effort it takes to prepare and document important data privacy policies. PrivacyEngine's extensive library of policy templates covers everything from Clear Desk Policies to Data Breach Notification Procedures. You can use the Document Management templates to create tailored policies, or upload and manage your existing documents with our version-controlled approval process.

Features:

- Centralised document management system for creating and sharing all your data privacy related policies.
- Library of policy templates for dozens of common procedures.
- Built-in document management workflow and approval process for creating and maintaining new documents.

Benefits:

- Simplify the complex process of creating, updating, maintaining and sharing necessary data policies.
- Save time and money with access to dozens of professionally written policy templates.
- Leveraging our data privacy specialists to ensure your policies and documents are in line with best practice.

Organisations small or large have a lot of policies and procedures in place, but the process of getting all the stakeholders to carefully read and sign to any new/updated ones can be one that's hard to keep track of. Organisations may need to have evidence that policies and procedures have been put in place and everyone is fully aware of them, in the case of an investigation being carried out. With PrivacyEngine, you can manage/track the full lifecycle of new/updated documents and ensure all stakeholders are fully up to speed with them.
