

Telehealth appointments now available

It's easy to schedule a virtual visit with your provider

Our new telehealth services allow you to schedule virtual appointments with your provider. During the appointment, you'll be able to see and talk to your provider from the comfort of your home on your computer, smartphone, or tablet.

This service is available to all our patients, regardless of insurance.

Here's how it works:

- Call to schedule a virtual visit for most of the services you would receive in our office
- Receive an email confirmation with a link to your virtual appointment (no setup or download required)
- Click the link and follow the instructions when it's time for your appointment

Note: If you have a medical emergency, please seek emergency care immediately.
