

Save money on certain tests
or procedures with your plan

Many of our Complete plans offer our members the opportunity to save money and pay lower out-of-pocket costs on outpatient surgeries and high-tech radiology.

How does it work?

Members pay less for certain tests and services received at non-hospital based facilities. As a member of a qualifying plan, if you have outpatient surgery at an ambulatory surgical center or a high-tech radiology test at a diagnostic imaging center that is not affiliated with a hospital, you save money with lower out-of-pocket cost sharing.

To learn more about the cost sharing for these services and procedures, see your plan's Schedule of Benefits at allwaysmember.org.

Which tests or procedures qualify?

- Outpatient surgery
- CAT scans (Computerized Axial Tomography)
- MRI (Magnetic Resonance Imaging)
- PET scan (Positron Emission Tomography)
- Nuclear cardiac imaging

At what facilities can I save money?

For high-tech radiology

- Go to the DoctorSmart provider directory at allwaysmember.org.
- In the search bar, type "Diagnostic Imaging Center"

The results allow you to filter by Best Match, Distance, Quality, Rating, and A to Z.

If you are not yet a member, you can get this information through our Find a provider tool at allwayshealthpartners.org.

For ambulatory surgical centers

- Go to the DoctorSmart provider directory at allwaysmember.org.
- In the search bar, type "Ambulatory surgical center"
