LUNAVI

Firewall Management

Maintain Security Posture & Reduce Staff Workload

Managing your firewalls can be difficult and time consuming, especially when adopting cloud services that are new for your organization. Lunavi expert staff and 24/7/365 Global Service Center can help.

Managed firewall services can cover the initial deployment and the ongoing management of your firewall.

Before the firewall installation, the Lunavi technical team works with you to understand your plan for protecting your network, and shares the standards for firewall deployment and management, ensuring the service delivers the results you expect with an approach that fits your needs.

Firewall management services are **available for Azure cloud environments, the hosted VMware gBlock Cloud, or physical devices.**

INSTALLATION & CONFIGURATION: Our team installs the firewall, configures rules, sets up the VPN, and completes IP configuration to optimize security and performance.

PATCHING & FIRMWARE UPDATES: We keep your firewall up to date with best practices update management.

MONITORING & BACKUP: Our 24/7 support staff monitors your firewall for health and availability, alerting your team of any issues

TECHNICAL SUPPORT: All managed firewall services include consultations with our technical and security experts in addition to our support center.
