Meet evolving needs for end-user computing with Azure cloud desktop services.

New work paradigms bring new challenges when delivering desktop services. Virtual desktops are a great way to provide a positive employee experience and boost productivity while exceeding expectations for performance, security, compliance, and resource constraints.

Virtual desktops are ideal for distributed workforces, organizations that face strict industry or government regulation, short-term employees, and specialized workloads like development and testing. By leveraging Microsoft Azure VDI, you not only gain best-in-class PaaS integrations but licensing advantages and optimizations for the productivity apps you depend on every day.

Azure Virtual Desktop offers fully-featured desktop computing delivered practically anywhere, including:

- Windows 10, Windows 11, or Windows Server multi-session desktops
- Remote application streaming
- Full control over configuration and management
- Citrix and VMware support
- Rapid deployment and scalability with consumption-based pricing

Cost Efficient

Lower TCO through licensing savings, labor reduction, and simplified administration

365 Integration

Built-in Office 365 features and optimizations for Windows

Flexible Deployment

Your choice of OS and end client device, persistent or non-persistent desktops, & more

Native Security

Azure Active Directory, reduced attack surface, granular access control, & isolated user sessions

Legacy OS Support

Migrate existing Windows Server (RDS) or Windows 7 with extended security updates through 2023

Managed AVD Services

Lunavi managed virtual desktop services are backed by our 24/7 customer support and Azure Expert MSP staff. We'll ensure your desktop environment is optimized, secure, and up-to-date.

Technical Discovery: Lunavi will configure Active Directory and provision infrastructure according to requirements

Consultation & Optimization: Lunavi provides ongoing maintenance of the cloud desktop environment to meet your current goals and utilization

Network Connectivity: Lunavi staff will configure connections to on-premises resources via ExpressRoute or VPN as well as cloud network architecture

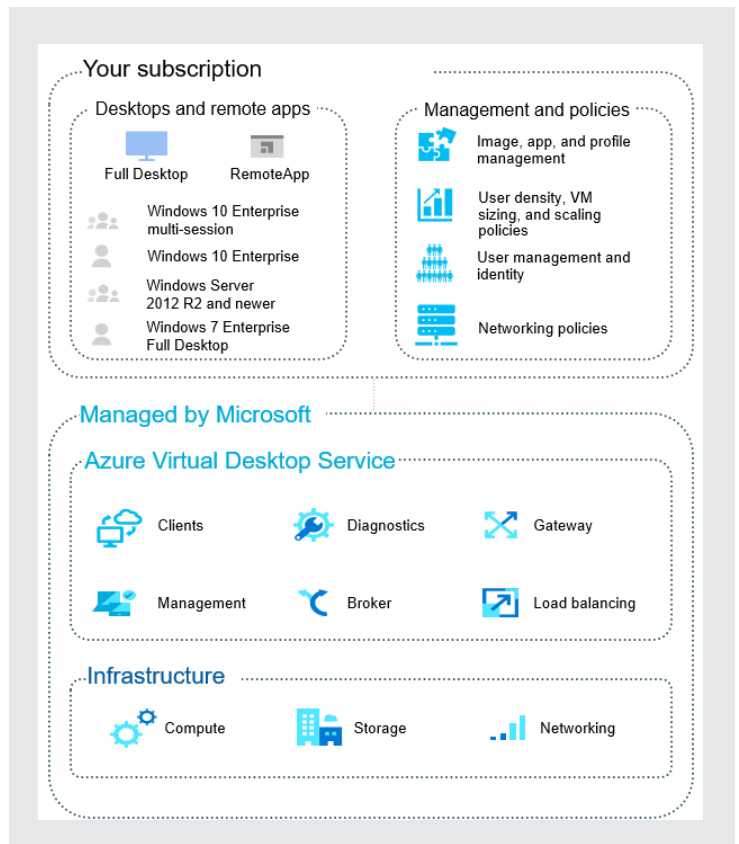

Management & Patching: We deploy, configure, and manage desktops according to policy, including desktop images, profile containers, scaling, third party software*, and inventory

Monitoring & Support: Our 24/7 Global Service Center monitors your AVD environment and provides proactive notifications

Data Protection: Bring your own backup solution or choose Lunavi Backup as a Service to keep your data and applications safe from loss or downtime

Information Security: Data encryption, Azure Sentinel logging, and standard security policy are applied for security hardening and configuration

**Third party software patching responsibility belongs to the client*

ABOUT LUNAVI

As a leading managed service provider and consulting firm, Lunavi is focused on helping customers advance their digital transformation goals by modernizing business applications, migrating solutions to the cloud, designing hybrid cloud solutions, and applying Agile and DevOps engineering practices to build new, innovative solutions. Our portfolio of services is designed to provide continuous improvement along each step of the IT journey to maximize business value and success. We are a Microsoft Gold Partner and Azure Expert MSP, offering deep expertise in the Microsoft ecosystem of enterprise IT software and services. Visit us at www.lunavi.com to learn more and follow us on LinkedIn, Facebook, and Twitter.
