

Microsoft Solutions

Microsoft Technology Pillars

Lunavi is a Microsoft Gold Partner and an Azure Expert MSP with on-staff MVPs and longstanding expertise with Microsoft software, services, and solutions ranging from Azure-as-a-Service options to on-prem IT management tools to Power BI and analytics.

MANAGED AZURE: Our Azure Expert MSP team can migrate and manage your workloads so your team is freed from ongoing administration. Gain flexibility, performance, availability, and efficiencies through managed Azure services.

OFFICE / MICROSOFT 365: Get the powerful productivity and collaboration tools you need from Microsoft 365 backed by full migration assistance and ongoing support. Setup and security will be managed for you so you can focus on collaborating efficiently.

ENDPOINT MANAGER: Simplify management of your cloud or on-premise platforms with Endpoint Manager. We can help manage, modernize, and your System Center deployment to this new cloud-based platform.

VMWARE ON AZURE: Extend your existing virtualized resources to the cloud, use Azure-native tools within and alongside your VMware environment, and manage them from a single portal by implementing VMware on Azure.

WINDOWS 10: Avoid upgrade difficulties and downtime with Windows 10 desktop modernization. Improve productivity, increase security, and provide a better user experience with Windows 10 deployment and configuration services.

ASR / ZERTO TO AZURE: Replicate your workloads to and from cloud environments to ensure business continuity and app reliability. Accelerate IT transformation while reducing the risk and complexity of modernization and cloud adoption.

How to get started

Lunavi's sales and engineering teams are ready to help you assess your current landscape and map out your journey. To get started, contact your Lunavi representative or email us at sales@lunavi.com

MICROSOFT TECHNOLOGY PILLARS

- Apps & Infra
- Modern Workplace
- Data & AI

Application Modernization

Update and refactor existing applications to take advantage of cloud capabilities or modernize your applications to align more closely with current trends and business needs - our team of devs and consultants can help.

Azure Security

Reduce the cost and complexity to get a comprehensive monitoring and alert system across your entire environment using Azure Sentinel for security information and threats and Azure Monitor for application insights.

Power BI

Gain insights and analytics through Power BI. Customizable dashboards and reporting help you make informed business decisions with source data from across your entire digital business infrastructure and applications.

Automated Linux Patching

Automate the manual activities involved in server patch management and validation testing with a combination of coaching, tools, and processes that save you time.

Azure DevOps

Azure DevOps track your ideas from development to production throughout your entire organization. Gain visibility and insight into your team activity, facilitating milestone tracking and collaboration.

SpotLITE Discovery For Azure

Go beyond the discovery process with SpotLITE (Listen, Implement, Test, and Execute). We deliver in-depth benchmarks and suggestions to provide a complete implementation plan for your project.

Veeam Backup to Azure

Gain the benefits of a data center without paying for one. Veeam to Azure provides stable data protection and recovery while eliminating physical hardware equipment with Azure integration.

ABOUT LUNAVI

As a leading managed service provider and consulting firm, Lunavi is focused on helping customers advance their digital transformation goals by modernizing business applications, migrating solutions to the cloud, designing hybrid cloud solutions, and applying Agile and DevOps engineering practices to build new, innovative solutions. Our portfolio of services is designed to provide continuous improvement along each step of the IT journey to maximize business value and success. We are a Microsoft Gold Partner and Azure Expert MSP, offering deep expertise in the Microsoft ecosystem of enterprise IT software and services.
