## Five advantages

### 1 Increase your performance when accessing your SaaS applications

Best performance for your SaaS applications by reducing latency and packet loss across your WAN network.

### 2 Global integration with cloud providers

You simply pick the cloud providers you need, and we take care of the rest.

### 3 SD-WAN performance with the global IP core

Combined with the Global IP core, our solution complements your SD-WAN architecture by enhancing WAN performance.

### 4 Reach new levels of scalability

Instantly add capacity, so your network is always ready to meet your needs, regardless of how fast you grow.

### 5 Save costs

By simplifying your infrastructure, we deliver cost savings. You only pay for what you need.
