### Compliance made easy with OSHA recording

The OSHA Log is one of the many tools available from CopperPoint Insurance Companies. This invaluable tool will allow you to track incidents, store data and generate OSHA compliant reports in a few easy steps.

- Use the **Ask Incident Advisor** to determine which injury or workers' compensation claims to include in OSHA reporting.
- Capture all required information with the **Record an Incident** wizard that guides you through the documentation process.
- Avoid potential errors by allowing the OSHA Log **Print a Form** feature to do all the calculations. Simply download, print and post the 300A report.
- **Electronic Reporting** makes it almost effortless to comply with the OSHA electronic reporting rule. Export data as a CSV file and submit to OSHA.
- Easily control your product experience and OSHA Log setting preferences with the **User Setting page**.
- Remain in constant compliance with **Automated Email Reminders**, which send annual alerts for Form 300A deadlines and prompt you to compete unresolved incidents.
- View only the establishments that are important to you with **Watched Establishments**.
- Prevent errors in reporting incidents to inactivate establishments with **Archived Establishments**.
- Share your feedback on the OSHA tool through the **Feedback Form**. This feedback will help drive future feature enhancements.
- Walk through key OSHA Log features with the **Onboarding Introduction Tutorials**.
- Understand where you fall in comparison to national averages with **Incident Analysis Reporting**. You can review and compare establishment data for OSHA recordable incidents, days away from work cases and days away/restricted/transfer cases (DART) to Bureau of Labor Statistics (BLS) data.
