## What to do if you have been involved in an auto incident:

Policyholders should err on the side of reporting any instance in which they believe they might later be accused of causing injury or damage to another party.

**Do not admit fault**

**Confirm no one is seriously injured** or in danger

**Call 911 if appropriate**

**If the damage is minor, move vehicles** out of traffic to a safe place

**Shift into park**, turn off your vehicle, and turn on the hazard lights

**Use cones, warning triangles, or flares** for added safety, if you have them

**Take photos of everything, including:** License plates, Vehicle impact areas, VINs, Scene surrounding the accident, Insurance cards

**Report the accident** to your insurance company

**Exchange contact information** with the other driver any witnesses
