

# COVID-19 Safe Environment

We are taking an abundance of caution to ensure the safety of our patients, families, caregivers and visitors.

## Enhanced Screening

We are screening everyone for COVID-19 before entering our facility through daily temperature, signs and symptoms checks.

## Masks for All Visitors

Everyone who enters our facility will be required to wear a mask. If you have a mask at home, please wear it to your visit. Otherwise, we will provide one for you and your visitor to wear throughout your stay.

## Infection Prevention

We have removed frequently touched items such as magazines, toys, vending machines, coffee and snacks.

## Heightened Disinfection

We have increased the cleaning frequency of patient rooms, public and common areas, restrooms, waiting areas and any commonly touched surfaces. Our disinfectants are effective in killing the virus that causes COVID-19 and other pathogens.

## Social Distancing

We are adhering to social distancing, and our lobby is marked, so you will know where to stand and sit. This will also be factored in throughout all phases of care during your stay. If you prefer to wait in your car, please feel free to do so.

## Personal Protective Equipment for Colleagues

We have an adequate supply of PPE for our colleagues and physicians. This helps protect you, the patient, and our team from COVID-19 transmission.

## Hand Hygiene

Hand hygiene is always a priority for us. Hand sanitizer and hand washing stations are available throughout our facility.

## Visitors

To reduce overall exposure, we are currently limiting visitors to one per patient. For pediatric patients, two visitors may come to the facility.

## Following Safety Protocols

We are following Centers for Disease Control and Prevention (CDC), Centers for Medicare & Medicaid Services (CMS) and appropriate state guidelines for performing COVID-19 safe surgeries.
