Notification of Stock Delays

I am sorry to inform you that we are currently unable to fulfil open orders for the Lifeline series of Defibtech AEDs including replacement batteries. This includes any orders that may have previously been acknowledged and a delivery date advised.

We have been informed by Defibtech that they are experiencing unprecedented demand globally in conjunction with unexpected extended lead times for several components required in the manufacturing of the units. This means they are not able to fulfil the orders we have placed over the last 2 months. These components are common to the Lifeline series of Defibrillators and are not expected to have a significant impact on the View models.

I understand that this will impact your own customers and I assure you that we are in daily contact with Defibtech and will keep you informed of any updates. As of today, we do not have a firm date for delivery of our delayed orders, and this is expected to be provided by Defibtech within the next 2 weeks.

Once again, I am very sorry to have to provide this notification and I will provide an update on delivery schedules as soon as I am able.
