Cloud Computing ranked #1 In-Demand Skill

A large gap exists between the number of jobs available, and the few qualified, AWS certified candidates available to fill them.

Why Cloud matters:

» COVID-19 has forced CIOs to accelerate digital transformation, moving to the Cloud to support remote work and maintain business continuity.

» Bottom-line savings takes center stage as Cloud infrastructures bring down the cost of running an enterprise.

» Public sector Cloud spending has passed traditional IT infrastructure for the first time in 2020 according to IDC.

» Everything runs on Cloud for all size companies – it's cheaper, better, faster, so there's no turning back to traditional on-premise software.

AWS Ranked the #1 Cloud Network

SOURCE: GARTNER

Why AWS certification matters:

» There's a significant gap between the massive number of jobs available, and the few qualified, AWS certified candidates available to fill them.

» Among "the big 3 global Cloud providers," AWS is #1 over Azure and Google.

» AWS leads the way in supporting today's hottest tech trends: Artificial intelligence, data analytics, internet of things (IoT), and edge computing.

» A career in AWS Cloud services is almost recession-proof. Companies can't shut down their Cloud networks when businesses depend on 24/7/365 uptime.
