1) Power up the HealthGO Mini.

2) Wait until the end of initialization (at least 3 minutes). When initialization is complete, HealthGO Mini is in the following state:

   Note: Visual indicators shown in white may light in different colors and can be ignored for now.

3) Press the button on the thermometer.

   Note: Before first use, insert the included batteries into the thermometer if they are not already inserted.

4) Wait about 15 seconds before taking your temperature.

5) Take your measure with thermometer by gently placing thermometer at the entrance to the ear.

   Notes:
   - *Thermometer automatically initiates a communication with HealthGO Mini.*
   - *Do not switch off the HealthGO Mini until the end of data transmission.*

Note: The HealthGO Mini and the Thermometer must be in the same room for proper operation.
