

Combining global satellite messaging with map-based outdoor navigation, inReach Explorer+ is our do-it-all performer. It provides GPS guidance with preloaded TOPO mapping viewable directly on the color display. A built-in digital compass, barometric altimeter and accelerometer help you get and maintain accurate bearings, on or off the beaten path.

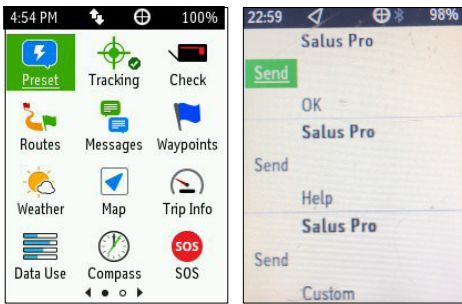

Messaging

You can send messages from your inReach device to mobile phones via SMS, email addresses, or another inReach device on TrackMe NZ System with an @satellite.trackme address

Preset Messages

3 messages have been created by TrackMe NZ and installed on your device that have predefined content and recipients. These can be edited online at trackme.nz Replies to Preset messaging count for data use on each plan and are chargeable except on plans with unlimited messaging.

1. Select **Preset Messages**
2. Select **Send** next to the desired message

Quick Text Messages

Messages created on your TrackMe NZ account that have predefined content. Recipients are chosen at the time the message is sent.

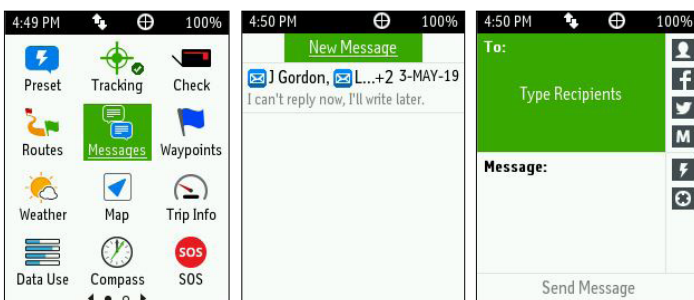

1. Select **Messages**
2. Select **Quick Text icon**
3. Select **message** select **contacts**, **Send**

Custom Messages

Custom messages can be composed directly on the inReach device through the virtual keypad.

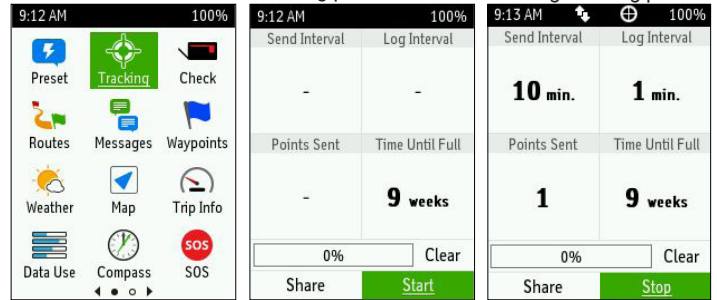

1. Select **Messages**
2. Select **New Message**
3. Select **contacts**, enter **content**, **Send**

Tracking

Tracking records your path. When you start tracking, your device logs your location and updates the track line on the map at the specified sending interval

1. Select **Tracking**
2. Select **Start** to send tracking points
3. Select **Stop** to disable sending tracking points

MapShare™ is enabled by default in the TrackMe NZ Portal so you can send a message to any recipient and your MapShare details will be included.

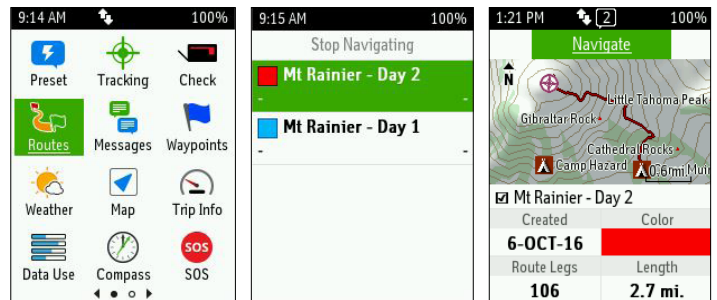

Navigation

You can navigate along a route or to a waypoint, or other device location on your inReach device.

Routes

A Route is a sequence of locations that leads you to your final destination, these can only be created for devices connected to a GARMIN Enterprise account and are not available on TrackMe.nz portal.

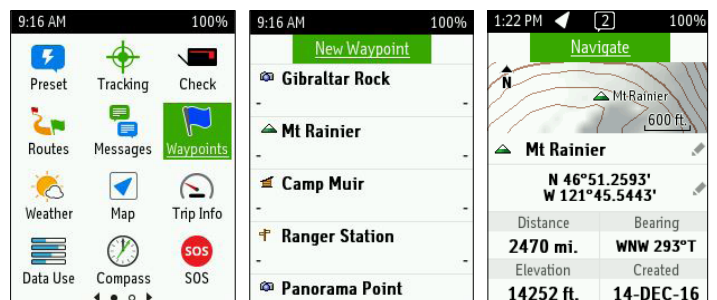

1. Select **Routes**
2. Select a route to navigate
3. Select **Navigate**

Waypoints

Waypoints are locations you record and store in the device. Waypoints can be created on your inReach device but cannot be exported by TrackMe NZ.

1. Select **Waypoints**
2. Select a **Waypoint** or **New Waypoint**
3. Select **Navigate**

SOS

During an emergency, you can contact the NZ Rescue Co-Ordination Centre (RCCNZ) and the TrackMe Rescue Response Centre

1. Lift the cap (1) press and hold the SOS button (2)
2. Wait for the SOS countdown to finish
3. A default SOS text will be sent to RCCNZ, and your emergency contacts

4. Message with RCCNZ and other contacts using Quick Texts or custom messages
5. Cancel the SOS if help is no longer needed

Note: During an SOS, your location information will be sent to RCCNZ. If you do not respond via text, RCCNZ will still contact first responders to initiate a rescue. TrackMe Rescue Response will contact your emergency contacts during the SOS.

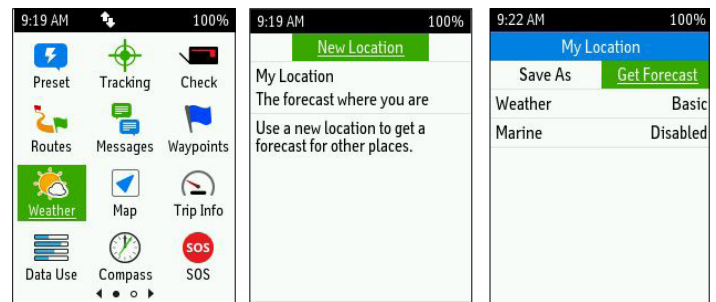

Weather Forecasts

Receive weather forecasts so you can make educated decisions based on local conditions or the destination ahead.
 countdown message will be sent

There are three types of forecasts:

- Basic land forecast (counted as a text message)
- Premium land forecast (incurs an additional charge)
- Marine forecast (incurs an additional charge, locations 8km from shore)

1. Select **Weather**
- Select **My Location** or **New Location**
3. Select forecast type and **Get Forecast**

TrackMe Pro Portal -

Your inReach account is managed through <http://trackmepro.com> Within your TrackMe Pro Portal account you can manage:

- Device names and allocations
- Delivery of Pre-Set messages
- Emergency Contacts
- Automated Profile check-ins
- Suspend current profiles
- See Status of workers in the field

Syncing

Once configured by TrackMe NZ, there is no need to re-sync the inReach device as no data can be transferred from the TrackMe NZ portal to GARMIN devices. Should the device need a firmware reset you will sent instructions on how to reset your device and sync the device then. All data on the device will be lost.

Pairing to a Mobile Device or Tablet

Use the EarthMate App to utilise the keyboard and screen on your compatible mobile device (phone or Tablet) to control many of the functions on your device, even outside of cell range.

Use EarthMate to:

- Download maps to your mobile device
- Start and stop tracking
- Navigate a route and manage waypoints
- Compose, send and receive messages
- Use the address book on your mobile device
- Get Weather reports, drill down for forecasting
- Trigger and cancel SOS

Pairing the App

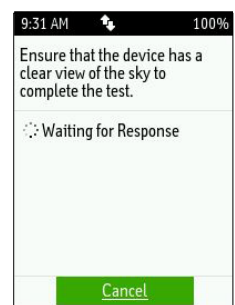

1. Download the Earthmate app:
Apple® and Android versions available
2. Connect with inReach using Bluetooth
Connect button

Testing

TrackMe NZ has installed a simple test protocol for every unit.

- Simply send the message #Test to anyone
- Wait for the device to send the message
- Once sent, navigate the the Check icon
- The device receive a message from the server
 - Device test successful

An active satellite subscription is required for live tracking and messaging functions, including SOS
