Compromise
Assessment
conducted

Final Report delivered
in preferred format
i.e ISO27001

Too often cyber-crime investigations reveal that digital evidence and attack indicators were available prior to the breach being detected.

If these previously undetected vulnerabilities are identified early, companies can intervene to minimise risk and avoid future breaches.

GuardYoo provides companies with a secure, reliable and affordable Compromise Assessment including Forensic Analysis, within 1week.

GuardYoo's fully automated cloud-based solution reduces the time, resources and costs associated with a Compromise Assessment by 70%, allowing companies to identify and remediate their vulnerabilities faster and without having to over commit valuable resources.
