CERTIFIED PARTNER

HOOK SECURITY

CORE FEATURES AND SERVICES

FEATURES

Psychological Security

Use Psychological Security, or PsySec™, to train your employees to spot and avoid phishing attacks and create a healthy security-aware culture in your company.

Train your employees

Equip your employees with a solid understanding of phishing, ransomware and more while giving them the ability to recognize and respond to cyber threats.

Actionable reporting

Generate reports that help you track your progress, get compliant, and provide additional training to your most vulnerable users.

Done-For-You Training

We develop the phishing testing, create training material, and setup and run campaigns all for you. No picking templates, no scheduling campaigns or using employee resources. We've got you covered.

Phish your employees

Send automated phishing simulations to your employees and provide training to those who click.

Partner Program

While we're out here changing the way security awareness is done, our partners are saving time, growing revenues, and becoming heroes to their customers.

SERVICES

+ **Security Awareness Training**

Equip your employees with a solid understanding of phishing, scams, malware, social engineering, physical security and more while giving them the ability to recognize and respond to cyber threats in the workplace.

+ **Automated Phishing Testing**

We create new phishing tests every month and pair it with contextual training videos that match the phishing testing for the month.

+ **Psychological Security**

Psychological Security, or PsySec™, uses humor, repetition, a positive approach, and the latest research in neuroscience to train the part of the brain that houses threat recognition and response.

+ **Reporting With Actionable Insights**

We provide more reporting data than anyone else on the market, which allows you to facilitate positive security discussions between you and your employees.
