

THE DAWSON ACADEMY

Mini-Residency

How the Mini-Residency works...

The Dawson Academy created an exclusive program for 20 dentists and/or lab technicians who will study and complete The Dawson Academy Core Curriculum over an 12-18 month period.

This program is a post graduate mini-residency that teaches you to solve even the most complex dental problems involving esthetics, occlusal problems, TMJ issues, and advanced restorative care. The principles you learn can be applied to everyday dentistry or advanced dental cases.

The curriculum consists of seven courses: two lectures completed online, four hands-on courses completed in one of five locations in Florida, New Jersey, and Virginia and one final lecture completed in Clearwater Beach, Florida.

The four hands-on courses will be taught by Dawson Faculty and will be available throughout the 12-18-month period (and beyond) to support the members in their implementation and overall clinical success.

Benefits of the Mini-Residency program

INCREASE PRACTICE REVENUE

Tackle cases you currently are not confident enough to treat; many doctors say they recoup the cost of their training on their very first case!

ELIMINATE RE-MAKES AND FAILURES

by adding predictability to your restorative procedures. From a simple composite to a full mouth reconstruction and implants, The Dawson Academy's principles will forever change how you examine your patients and deliver care successfully!

GROW TOGETHER as a community by sharing experiences about implementing the material into your practice and encouraging each other between classes. From these experiences, you'll form strong bonds with classmates, which continue post-curriculum.

SAVE THOUSANDS OF DOLLARS

through this program (a 15% discount) with monthly financing options as compared to those completing the curriculum independently.

- ✓ **Treatment Planning - Functional Esthetic Excellence**
- ✓ **The Art & Science of Equilibration**
- ✓ **Esthetic Foundations 1 - Restoring Anterior Teeth**

One lecture course in Clearwater Beach, FL

- ✓ **Advanced Problem Solving**

"I highly recommend The Dawson Mini-Residency program to other dentists. In addition to learning, great camaraderie was developed and will continue among the students who took the entire year's

course together as one unit. The senior faculty are all incredibly gifted educators with different styles of teaching, so that as students hear key concepts explained in different ways with each course. The Dawson philosophy will get you thinking about patient care in a different way."

Dr. Jose Cazares, Texas

"After attending Functional Occlusion, I knew that I wanted to do the entire core curriculum and was excited to know that a Mini-Residency was in my area. By signing up for the Dawson

Mini-residency, I was finally able to complete the sequence in a timely manner and gain the skills and confidence to treat cases that had perplexed and intimidated me before. It helped me have a committed schedule and enabled me to implement what I learned at a good pace!"

Dr. Krithika Baskaran, Colorado
