Stone**Requested By: Rough-in**[Edit Master Item](#)
[Delete Master Item](#)

Please visit Edwards Stone for your stone choice. Verify any specific installation details with Edwards Stone (such as drystack or grouted joints).

Dry-stack stone is not an option for the exterior of the home. Among other issues,

dry-stacked stone is susceptible to water getting behind it. This may result in that water freezing, and popping the stone off the wall. We can give your stone the dry-stack look by placing the stone very close together, while maintaining a very small grout/mortar joint.

Please make a selection for both exterior and interior (such as fireplaces).

Supply/Stock Drywall in Basement

Requested By: Rough-in

[Edit Master Item](#)

[Delete Master Item](#)

This option is to supply/stock drywall in the unfinished basement. This is simply to stock it...not hang it. This will make any future basement finish much easier. You have the correct amount of drywall, and the correct sizes. Many times, the unfinished basement is hard to access with drywall once the home is finished. This may force them/you to use shorter pieces, causing additional joints/labor/sanding /costs. In addition, you don't have to mess with carrying pieces of drywall around, or having suppliers trudge through your finished home.
