93% of participants would participate in Careerhouse again to continue learning about their career journey.

99% of participants would recommend this course to a member for her career development.

BEFORE CAREERHOUSE

AFTER CAREERHOUSE

“

I was laid off in May, and have felt very lost after job hunting for so long with little results. From this course I revamped my resume, which has gotten a lot more notice, and I will feel more comfortable negotiating when the time comes. I had a promising first interview with a company I love this week and I'm hopeful again.

“

I have a much clearer idea of what I'm looking for and what will make me happy in my career. A lot of classes and career coaches skip what we did in session 1. That class was SO GREAT for me.

This course has made me so much more confident! I loved meeting every weekend connecting with sisters with different backgrounds and realizing we are all in each other's corners ... for the first time in months I'm actually getting hits from companies to set up interviews.

”

This experience really helped me build confidence in the job market and provided me the tools to be genuine & vulnerable in interviews at companies that align with my values!! My interview last week went well and just got an email for setting up interview #2 at the UN Foundation (one of my dream companies!)
