

Inlogik is an established leader in premier card and expense management solutions, empowering business professionals with greater spend visibility and insight. Intuitive, intelligent and innovative technology targeted at managing growth, strategic procurement and supplier engagement.

As a provider to large global enterprise customers in regulated industries, Inlogik manages a broad compliance program spanning SOC 2, ISO 27001, ISO 27701, PCI-DSS and privacy regulations like GDPR, the APP and OAIC NDB.

Why did you choose AssuranceLab?

We began our quest for SOC 2 certification in 2018 and looked at a number of providers though weren't impressed by any of them, and/or the costs were prohibitive. We found AssuranceLab led by Paul Wenham and everything seemed so easy and positive.

How does SOC 2 compare to your other audits?

We manage external audits across SOC 2 Type 2, ISO 27001 and PCI DSS compliant but feel that our SOC 2 compliance is such a streamlined process with Paul and his team at AssuranceLab. We can't thank them enough. We look forward to maintaining our SOC 2 compliance with them in the coming years.

How do you rate your experience with SOC 2 and AssuranceLab?

We found the whole process to become Type 1 SOC 2 and then Type 2 SOC 2 (Jan 2021) was a complex problem made easy by AssuranceLab. Whenever we had a query about anything the responses were prompt and thoughtful. I would highly recommend AssuranceLab (and have done) to anyone looking to become SOC 2 compliant.
