Custom Development

Were you unable to find a product listed that meets your needs? Or perhaps you're not satisfied with your existing product? In either case, please let us know. With the support of our plastic engineers, YKK can custom design a product to meet your requirements.

➤ DESIGNING

With the use of CAD tools such as Pro-E, enable 3-dimensional drawing and rapid electronic exchange of information in a variety of formats.

➤ RAPID PROTOTYPING

The rapid prototyping system is designed to provide high quality, 3-dimensional models conveniently and quickly throughout the design process.

➤ FUNCTIONAL PROTOTYPING

Single cavity prototype molds are available when physical tests for production quality samples or small lot production runs are required.

➤ DIESET MANUFACTURING

YKK offers a variety of tooling options to meet individual cost, quality, and capacity requirements. Both domestic and Asian tooling are available as well as YKK's own In-house mold production.

➤ STRESS/STRENGTH ANALYSIS

Our in-house computer analysis tools help identify and correct design weaknesses, thereby reducing production downtime and retooling costs.

Let YKK's Field Technology Center work for you.

YKK's Field Tech Center develops methods and machinery used by our customers to integrate our fasteners into their finished products. Labor reduction, improved quality, and de-skilled operations are all benefits of this YKK service. With over 5,000 machines leased to customers in this hemisphere, it is imperative that our solutions are cost effective. The combination of outstanding products, along with the technical expertise that YKK can offer, makes YKK your leading fastening products supplier. Whether it's one of our existing solutions or a custom development, let us find a solution for your manufacturing needs.

YKK

Little Parts. Big Difference.®

PRODUCTION

With injection machines ranging from 40 to 300 tons, our global manufacturing locations enable us to meet customer requirements on time whenever and wherever they are needed. Whether you are looking for a domestic manufacturer to reduce lead times or need products delivered to anywhere in the world, YKK can help.

QUALITY

With awareness that quality is of the utmost importance, YKK regularly invests in training and continuous improvements from development to production. YKK's offering of several UL certified products along with our ISO 9001 certification are just two examples of YKK's commitment to quality. Whether you need to meet UL, NFPA, military, automotive, or other specifications - you can rely on YKK for your inspection molded needs.

ENVIRONMENT

We promote environmentally friendly measures in all our activities. From product design to manufacturing we make sure that we are doing our part to help recycle within our plants and offices. YKK is also certified by ISO 14001.
