CONSTRUCT

- Resident Engineering Services
- Design-Build Programs

MANAGE

- Asset Management Solutions
- Risk Analysis
- Life Cycle Modeling

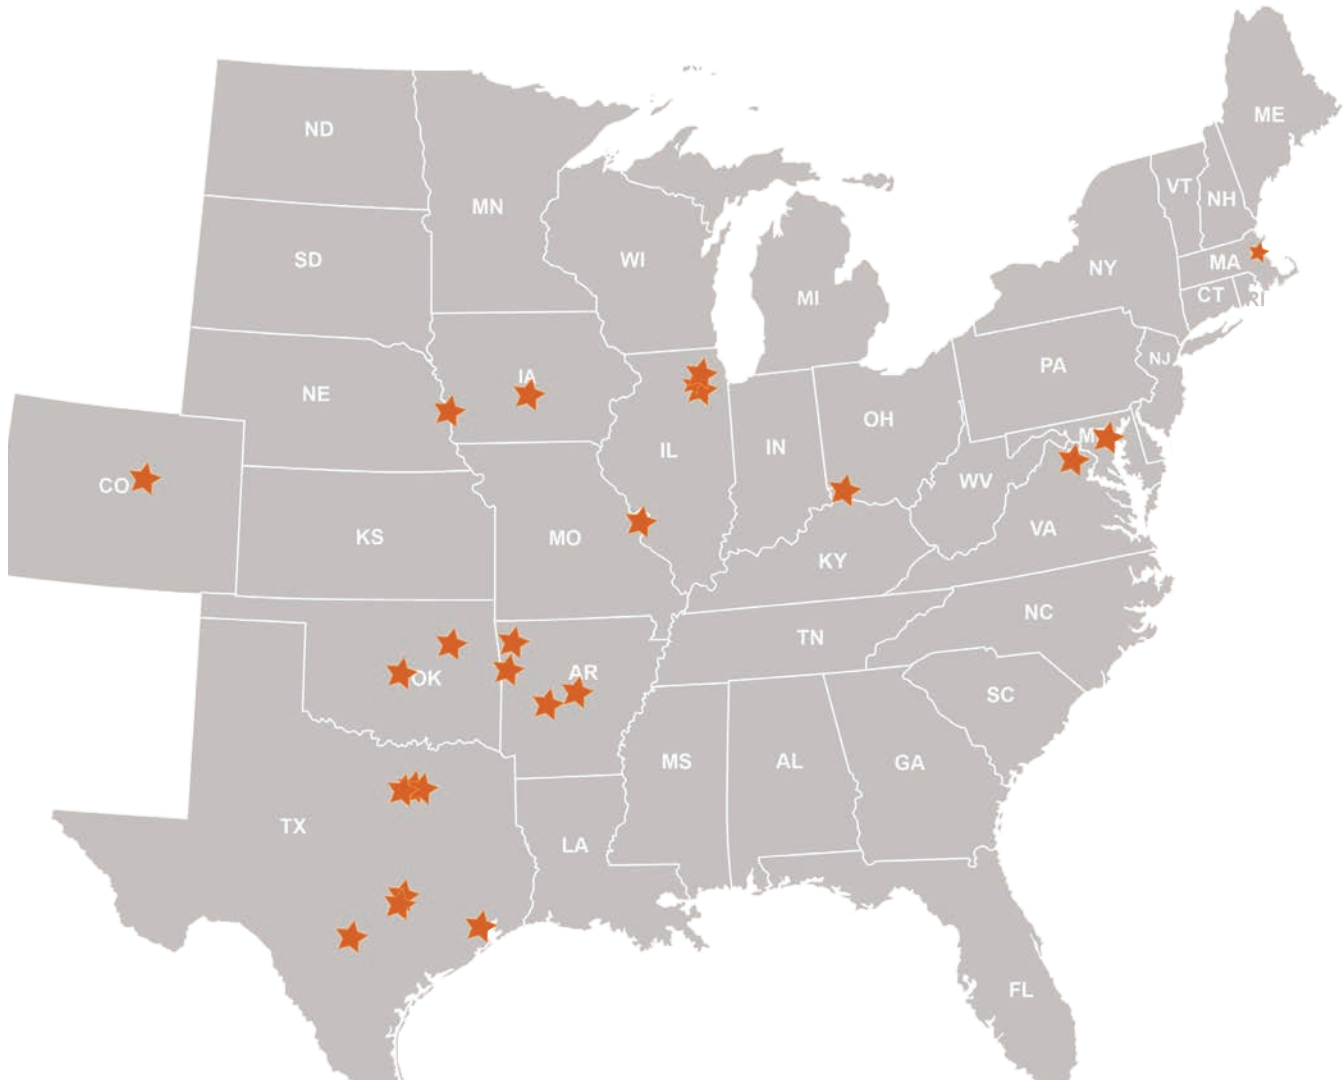

ENSURING CONSISTENT CLEAN WATER SERVICES IS THE PRIMARY OBJECTIVE OF ANY WATER DISTRIBUTION IMPROVEMENT PROGRAM.

RJN Group, Inc. can assist you with finding sources of non-revenue water loss and developing solutions to ensure continuous water services for your community. RJN engineers will help you develop a comprehensive program, applying emerging, yet proven, inspection technologies to understand the condition and remaining useful life of your water transmission and distribution assets. Our water system programs always strive to deliver sustainable solutions to ensure long-term service life of municipal water system assets.

LOCATIONS

RJN serves municipalities and utilities through offices located across the country.
