

# PRO-QS FUEL TRAIN SERIES

## EFFICIENCY. CONSISTENCY. FLEXIBILITY.

The PRO-QS Series of pre-assembled fuel trains are compact solutions designed for simple installation and easy maintenance. The PRO-QS Series supports many of our already-proven fuel train designs. When paired with a Profire BMS controller, the PRO-QS Series can offer powerful, yet simplified control, safety, and reliability for your process heating equipment.

### CORE APPLICATIONS

- GAS PRODUCTION UNIT
- HEATED TANK
- SEPARATOR
- GLYCOL DEHYDRATOR
- AMINE REBOILER
- FWKO (FREE WATER KNOCK OUT)
- TREATER
- LINE HEATER
- SALT BATH HEATER

## WHY THE PRO-QS SERIES?

### REDUCE COST & COMPLEXITY

- Factory function tested
- Simplified Installation
- Mechanically and electrically pre-assembled
- Supports new installations and retrofit projects

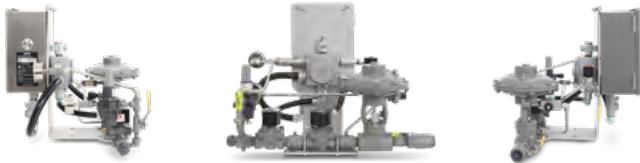

### INCREASE EFFICIENCY

- Plug and play
- Build/Specification
- Painless procurement

### FLEXIBLE CONFIGURATION OPTIONS

- Designed for applications up to 5MM BTU/hr
- 24VDC / 12VDC low power
- Left or right inlet designs
- Mounting options to support your application
- PF2200, PF2100, PF3100 compatible
- PRO Series Installation Kits
- PRO Series Regulator Assembly
- Multiple Fuel Train Styles

### MOUNTING OPTIONS

STAND MOUNT

WALL BASE MOUNT

## BURNER MANAGEMENT IS WHAT WE DO

Work with a Profire expert to build *exactly* what your application needs.
