

Stratus®

Save money and energy with lighting controls.

Did you know that lighting alone can account for up to half of your business' total electricity bills?

And, that on average, **30%** of the energy you use could be going to waste?¹

Companies that embrace new energy technologies enjoy a triple-bottom-line win in productivity, profits and planet.³

Smart lighting control systems allow you to switch off fixtures in unoccupied areas such as the restroom and storage room, reducing energy consumption and improving safety.²

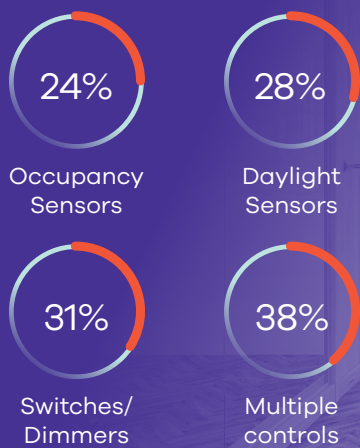

Lighting control systems contribute to:

Drop in lighting costs

Annual savings in yearly utility bills.⁴

Average energy savings potential in commercial buildings by control⁵

Call today to learn more about our lighting control systems and other energy services.
