

5 Ways Offices Are Using Raydiant

People know digital signage for its customer-facing uses. But did you know Raydiant makes a powerful behind-the-scenes tool as well? That's why more offices are looking to Raydiant to handle intra-office communications and build better experiences.

Here are just some of the ways businesses are using Raydiant in their offices:

1 **Managing office communications**
Offices are busy, complex places. Raydiant is the easy, simple communications solution. Use one of over 160,000 templates to create highly-visible, communicative signage for your office. Whether it's a new office policy, a company-wide memo, or a celebration of one of your employees, Raydiant lets you create and deploy effective messaging in minutes.

2 **Creating a "digital watercooler"**
Just because it's a workplace doesn't mean it can't also be a place to socialize. Raydiant can help you create a natural gathering point where employees can relax and form tighter bonds. With the Multizone app, you can combine elements like stock and news tickers, video, and widgets to create vibrant displays. Inspire the types of conversations that lead to game-changing innovation.

3 **Giving access to the right people**
Proper data management is essential to keeping a large operation running smoothly. With Folders and Nested Folders, Raydiant gives you an easy way to organize your data and manage who can access it. It even integrates seamlessly with the world's most secure and convenient security tools so your organization won't miss a beat.

4 **Welcoming guests**
You only get one chance at a first impression. Raydiant helps you make it a good one. With full multimedia support, you can create an inviting welcome display for your lobby. You can even use Raydiant to provide a soothing musical background to complete the welcome experience.

5 **Updating information instantly from anywhere**
One of Raydiant's best features is its cloud-based platform. You can log in from anywhere, anytime you want and update any or all of the screens in your network with just a few clicks. Perfect for the busy boss on the go.
