

# How To Create The Best In-Location Experiences for Your House of Worship

Houses of Worship play an important role in people's lives. They can serve as a place to practice faith, celebrate major life milestones, or be together with one's community. Give your congregants the best experience you can offer--one that makes them safe, welcome, and fulfilled.

Here are just a few ways you can provide the best experience in your house of worship.

**1 Make your congregants feel welcome**

Whether first-time visitors or long-time members, it's important to let people know they're welcome in your house of worship. With Raydiant, you can create slides that give warm, personal welcome messages, show off the beauty of your building and grounds, or display photos of happy, smiling congregants being together, all in one presentation.

**2 Create a safer environment**

As you welcome your congregants back to your house of worship, you'll need to make sure everyone does their part to keep your community safe. Use Raydiant to help you create signage that makes people aware of safety guidelines like social distancing, hand-washing, and avoiding hugs and handshakes. With over 150,000 templates to choose from, you can create bright, highly-visible signage that people can't miss.

**3 Celebrate your community**

Your house of worship is a central part of its community. Raydiant can help you create vibrant community boards that provide spaces for people to share news about members and their families, advertise the latest bake sale, or post photos of the latest volunteer effort or gathering

**4 Reach the next generation.**

Today's younger generation has grown up immersed in a world of digital screens. Speak to them in their language. With Raydiant, you can create engaging social walls that bring your organization's Instagram page into the real world. Show off your own account or create a custom content feed that shows your younger members you understand.

**5 Lead a more modern service**

Rather than pamphlets that can spread disease, use bold, high-contrast digital signage to guide your services. Just place a large digital screen at the front of your place of worship, and use them to display passages from holy texts, lyrics to hymns, or visual aids during a service. One screen not enough for the whole congregation? Add as many Raydiant-enabled screens as you want and control them all from one simple, easy-to-use remote platform.
