

Presenter, for Gorgeous, Glitch- Free Presentations on Your In-Store Screens

Introducing a new and seamless way to play your PowerPoint and Google Slide presentations on your in-house screens: Raydiant's Presenter app. This easy-to-use presentations app ensures that your slideshows always play as intended. We're talking an easier-than-ever playback solution that lets you upload and play your slideshows in their native format—no converter needed. No more formatting issues, glitches, or frozen screens—just seamless playback that delivers an engaging, uninterrupted customer experience.

The Presenter app is one of the free apps included with a Raydiant Lite subscription. To gain access to our premium apps, including those that offer custom background music and menu management tools, upgrade your Raydiant subscription to Standard or higher.

PRESENTATION PLAYBACK WITH NO SURPRISES

Sick of not being able to load your presentation on your device, or to play it only for it to glitch or freeze up altogether? With the Presenter app, there are no surprises—your slideshow presentations will play just like they did on your computer: animations, formatting, and all. Just load your slideshows from your Microsoft OneDrive or Google Drive accounts or export your slideshows as PDFs and upload them directly to Raydiant. Then just press Play!

SHOWCASE YOUR BEST PRODUCTS AND SERVICES

Use your in-store screens to show off your brand, whether it's with slides of your most scrumptious food specials or your latest property listings. Restaurants, retail stores, real estate agents, hotels, spas—whatever your industry, a well-designed (and well-played) presentation of your best brand images will put customers in the mood to dine, shop, and buy. You can also use your screens to tell your brand story, inform your customers about your products, display the latest public health info—and Presenter will make it happen with seamless slideshows.

SLIDESHOWS YOU CAN SET AND FORGET

The Presenter app is truly a “set and forget” solution for your in-location displays. It lets you automate and schedule playback so that your presentation runs on a loop or stops playing at a certain time. You can also set the duration of your slides and transitions during automatic playback. This gives you full control over how your presentations look to your customers, who will love learning about what your brand has to offer through this visual media.

CHANGE SLIDES WITH EASE—AND FROM ANYWHERE

To simplify things even more for our customers, we've engineered the Presenter app so that slides can be changed using a remote or the clicker of your choice. No additional costs for additional software—you can simply use what you already have on hand. Plus, the Presenter app lives on the cloud-based Raydiant platform, meaning you can upload and manage your presentations from any device, anywhere.
