

# Trabon's MenuNet Saves Time by Centralizing Menu Management

It can be frustrating to have to change all your online menus every time you make an update. And what busy restaurateur has the time, when there's so many moving parts to keeping a restaurant running and lucrative? Raydiant's MenuNet app integration simplifies menu management by letting you make, schedule, and update all your digital menus—from menu boards to third-party platforms—using one app. MenuNet also lets you design your menus with the graphics and text you want, easily adding delicious sizzle reels, nutritional info, and promotional and seasonal menus as needed. Your digital menu boards, powered by MenuNet, are also more effective advertising tools than static menu boards—and easier to read. As such, these digital displays simplify the ordering process and engage customers for longer, even reducing their perceived wait time by 35%.

### **GOING CONTACTLESS, MADE EASY**

Together, Raydiant and MenuNet are the perfect tools to get your contactless services going. Easily create QR codes from the Raydiant interface and add them to your menus via MenuNet, where customers can scan and view your menu on their phones. Post MenuNet menu boards in takeout and delivery areas, using them to provide pickup instructions for customers and delivery drivers. Put more digital menu boards in your front windows, entryways, and outdoor patios. Update them all in seconds from the MenuNet app.

## MAKE UPDATES FROM ANYWHERE

Carry all your restaurant management tools with you via Raydiant's cloud-based platform. You don't have to be onsite to manage your restaurant—all of Raydiant's restaurant tools (MenuNet included) can be accessed from your smartphone, laptop, tablet, or PC. Any time you want to make a menu change, switch out your background music, create a social wall, or make a digital poster for your next promotion or special event, you have what you need at your fingertips.

# SIMPLIFY AND STREAMLINE YOUR WORKFLOW

MenuNet simplifies every part of your management flow, even integrating with your existing POS system for a smooth transition. Using MenuNet with your POS allows you to keep track of inventory and sales, streamlining your back-of-house processes and saving you and your staff time. MenuNet also lets you schedule your menus ahead of time so they automatically display dayparting, special, and promotional menus-no need to stop during your busiest times to switch them over.

### **MULTIPLE MENUS, ONE MANAGEMENT TOOL**

Keep all your online menus and digital menu boards up to date via one, centralized app. Trabon's MenuNet lets you add and remove menu items, update pricing, add special promotions, create happy hour menus, and more. You can also add animations, videos, and other fun visuals to make your menus pop.
