

# Raydiant and Toast POS: Working Together to Power Your Restaurant

Running a restaurant can be overwhelming. To better support our restaurateur customers, we've integrated the restaurant management platform Toast with the Raydiant Experience Platform. This Toast POS integration gives restaurateurs a central hub from which they can easily and automatically manage digital menus, self-service kiosks, digital signs, and so much more. This connected, self-sustaining system automates menu management and other workflows, for a restaurant management tool that's always working for you. Here's more of what the Toast POS integration can accomplish:

### MANAGING YOUR MENUS IS A PIECE OF CAKE

Running out of an ingredient? 86 an item? Since the Toast POS system is linked to your Raydiant screens (from your digital menu boards and drive-thru screens to your self-service kiosks), your menus will automatically update any time you make a change. You can also set your menus to manually update, so you can update your menus individually or across the board anytime you want to make a change. Either way, your menus update in real-time, so they're always up to date.

### GOING CONTACTLESS MADE EASY

Going contactless in your restaurant can be daunting, but the Toast app makes it easy. Create and display QR codes right from the Raydiant dashboard so customers can scan to order and checkout, or to learn more about a menu item. They can also use your Toast-enabled touchscreens to sign up for or access loyalty programs, order drinks and food from their table, and play interactive games as they

### EVERYTHING'S MANAGED IN THE CLOUD FOR YOUR CONVENIENCE

As a restaurant owner or manager, you don't have time to drive to the restaurant, or a different location, each time you want to make changes to your screens. Raydiant is a cloud-based platform that gives customers the freedom to manage their digital screens and interactive touchscreens from a web-based portal. Design gorgeous promotional posters, update menu items and pricing, add to your contactless delivery options, and more—and do it from anywhere, on any device.

### STREAMLINING YOUR BACK-END WORKFLOWS

Toast integrates with your existing POS, creating a restaurant management ecosystem that streamlines your back-end workflows. With Toast, you can access your inventory, accounting, payroll, menu boards, and touchscreens all from the same system. Control your delivery, takeout, and mobile orders from this same, comprehensive system. Accept digital orders and mobile payments seamlessly, without skipping a beat.
