

The Virtual Room: Build a Stronger, More Connected Remote Team

Remote workers are **quickly becoming the norm**, but to create a thriving remote team, you need the right tools. The strength of a company hinges on its communication—in fact, **94% of businesses** say that the right communication tool boosts productivity and morale, both of which are vital for maintaining a strong company culture.

Raydiant has created an all-in-one communications and messaging hub that keeps your team on task and connected for when you all can't be in the same room. Collaborate, meet, and brainstorm with face-to-face communication on a hub separate from your main workstation.

TWO OPTIONS, ONE PURPOSE

Virtual Room is available in two versions: the plug-and-play hub uses a Raydiant-enabled TV screen, and the tablet hub uses a Microsoft Surface touch-enabled tablet. Both versions use an HD camera, internet connectivity, and Zoom or BlueJeans video conferencing to create a communications hub where you can meet face-to-face with your team and relay important on-screen messages.

BUILD STRONGER RELATIONSHIPS

From brainstorm sessions to watercooler hangouts, **social time is critical** for your company's productivity and culture. Virtual Room's gallery rooms are places where your team members can gather one-one-one or in groups to collaborate, spitball, and stay in touch. And with the system's easy navigation, users can hop into—and even between—rooms with a click of their mouse (no meeting IDs, passwords, or calendar invites needed).

STAY CONNECTED WITH YOUR TEAM

You and your employees can stay productive and on task on their main workstation while staying connected to the team using Virtual Room second screen, which can be used for video conferencing, messaging, company updates and announcements, and more. With Virtual Room, it's easy to pop into an all-hands virtual meeting or branch off with a teammate for a one-on-one collaboration session—all while staying abreast of KPIs and important company announcements through on-screen messages.

THE VIRTUAL ROOM FOR BRICK & MORTAR LOCATIONS

The Virtual Room is a versatile communication tool with endless uses. Retailers can use Virtual Room as self-service kiosks to virtually visit and assist in-store customers. Doctors and healthcare workers can use it for telemedicine visits and to consult with other experts. Gyms and fitness studios can use it to train their members. Teachers can create virtual classrooms and assemblies. Religious groups can virtually congregate for worship services. Virtual Room helps you stay connected to anyone, anywhere.
