

IMMEDIATE PROFIT

WITH CNC AUTOMATION

THE HALTER LOADASSISTANT IS
SIMPLE AND READY TO USE AND IT
CAN BE CONNECTED TO ANY NEW
OR EXISTING CNC-MACHINE.

IMMEDIATELY INCREASE PROFITS WITH A HALTER LOADASSISTANT

The market conditions for your company in the machining sector have changed considerably in recent years. Your customers have become much more demanding. They expect you to supply at competitive prices, but they also demand smaller batch sizes and shorter delivery times. At the same time you have to deal with rising labor costs and a lack of CNC-operators. You need these operators for skilled labor, not simple repetitive jobs. You can overcome these challenges by choosing the right HALTER automation solution. We offer a wide range of HALTER LoadAssistants which substantially increase the production capability of your CNC-machine. 95% of our customers achieve ROI in less than 18 months.

For small and medium-sized batches you need a system with short set-up times and fast integration processes. HALTER CNC Automation has developed the HALTER LoadAssistants for this, based on its many years of experience in the machining industry and production automation. The all-in-one Universal (for turning and milling), the TurnStacker and the MillStacker. Compact, Premium and Big. Available with a 12 kg, 20 kg, 35 kg or 70 kg robot arm.

It is a smart and well-thought-out system and it does exactly what it is designed to do: load your CNC-machine with small and medium-sized batches. The system is very fast to set up and you don't need any knowledge about robots to operate it.

Would you like to immediately increase your profits as many other companies have already done in more than 25 countries worldwide? Do you want to invest in a system that will provide years of trouble-free loading of your CNC-machines, even with smaller batch sizes? Then choose the HALTER LoadAssistant and get in touch with us today!

EASY-TO-USE LOADING SYSTEM WITH SHORT SET-UP TIMES

METALWORKING COMPANIES
INVESTING IN THE HALTER
LOADASSISTANT IMMEDIATELY
SEE AN INCREASE IN THEIR PROFIT
MARGINS AND IN THE FLEXIBILITY
OF THEIR PRODUCTION, EVEN WHEN
PRODUCING SMALL AND MEDIUM
BATCH SIZES.

A man with a beard and blue eyes, wearing a dark blue shirt, is looking up at a large yellow industrial robot arm. The robot arm is positioned above him, and its mechanical components are visible. The background is a blurred industrial setting. The text "HALTER CNC AUTOMATION" is overlaid in large white letters, with a small orange horizontal line above the word "HALTER".

HALTER CNC AUTOMATION

HALTER LoadAssistant

The HALTER LoadAssistant has been developed based on HALTER CNC Automation's more than 25 years of experience in the CNC machining world.

The mission of HALTER CNC Automation is to help metalworking companies become immediately more profitable, even in the production of batches from 10 to 1000 workpieces, by supplying accessible automatic-loading systems.

We are continuously working on the development, production, distribution and service of our products. We do this with a team of specialists and in cooperation with highly qualified suppliers and distributors. This allows our customers to rely on our high-tech, robust and reliable automation.

- FOR EVERY BRAND OF CNC-MACHINE
- ALSO FOR YOUR EXISTING CNC-MACHINE
- HIGH FLEXIBILITY IN WORKPIECE VARIATION
- WELL-THOUGHT-OUT CAPACITY SOLUTIONS
- SET UP IN LESS THEN 5 MINUTES
- NO EXPERIENCE WITH ROBOTICS IS REQUIRED
- COMPLETE PLUG-AND-PLAY SOLUTIONS
- EASILY MOVED FROM ONE CNC-MACHINE TO ANOTHER
- DELIVERY WITH 12, 20, 35 OR 70 KG ROBOT

THE EASY WAY TO AUTOMATE YOUR CNC-MACHINE

Worldwide, in more than 25 countries, hundreds of HALTER LoadAssistants have already been delivered and are being used by fully satisfied customers. Thanks to the proven, high-quality technology and the support from our consultants, the production process is further automated and optimized. In 95% of the cases our customers achieve a return of investment of less than 18 months.
